

Fenner Classic **PA** V-Belts

ISO4184 – DIN2215 – BS3790 – RMA IP20

Fenner Classic **PA** V-Belts have specially treated jackets to give superior anti-static, heat and oil-resistant properties. All Fenner Classic V-Belts are static conductive to ISO1813, and will not self-ignite under severe slip/stall conditions.

 Fenner Classic V-Belts conform to the specification of the American Petroleum Institute.

Imperial belt designation denotes approximate inside length in inches. E section V-belts are also available. Consult FPT for non-standard belt lengths.																																																																																																																																																																																																																																																																																																																																																																																				
PRODUCT CODES 8 digit for standard V-Belts. Digits 1 to 3: standard 240. Digit 4: section letter Z, A, B, C or D. Digits 5 to 8: 0 then first 3 of 4-figure metric lengths, or first 4 of 5-figure metric lengths. E.g.: C10700 is coded 240C1070.																																																																																																																																																																																																																																																																																																																																																																																				
WORKING TEMPERATURES Fenner V-belts perform satisfactorily within the temperature range -40 to 70°C.
