

The new container line  
Smart tote box design by wez

**LOGILINE FUTURA®**  
**BLACKLINE FUTURA®**

**wez** SUISSE

# LOGILINE FUTURA® | BLACKLINE FUTURA®

The new wez tote box generation positioned for manual and mechanical handling. Suitable for any applications and uses. The new design considers sophisticated logistics requirements as well as application of current plastic injection technologies.

Characteristics and advantages of the FUTURA tote boxes at a glance:

*Hollow corner design in combination with the upper ribbed-rim-construction offers maximum stability and torsion stiffness.*

*Flat bottom with 4-side-chamfer and a tapered roof design, ensures smooth transportation on conveyor belts and other materials handling equipments.*

*Mechanical lifting and moving possible with openings on the upper rim and compatible with standard available equipment.*

*Close to the ground designed rib rims enable precise centring, lifting and pulling of the tote.*

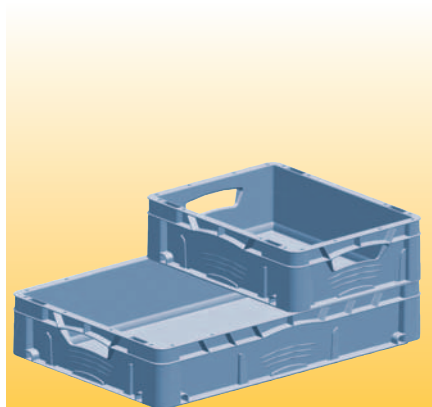

*The FUTURA tote boxes are available either with shell grip or with 2 handle holes.*

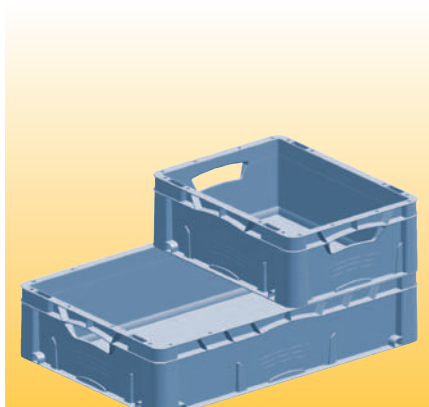

*Integrated vertical label holders on all 4 sides for A4 sized papers.*

# «NEW» and «OLD» tolerate each other perfectly

## **LOGILINE FUTURA® + BLACKLINE FUTURA®**

The new FUTURA tote boxes are 100% compatible with the current wez ranges LOGILINE® and BLACKLINE®.

### **Tote boxes**

*The interstackability with the current tote boxes (LOGILINE® and BLACKLINE®) is ensured without any restriction.*

### **Lids**

*Any sizes and versions of the current wez standard lids fit perfectly on the new FUTURA tote boxes.*

### **Subdivisions for tote boxes**

*Insert boxes and all further dividing systems of the current ranges LOGILINE® and BLACKLINE® will fit into the new FUTURA tote boxes.*
