

The new generation of service tools: Kraftform Kompakt®.

Compact tools for both manual and power screwdriving.

Compact boxes – small enough for the pocket.

Extremely versatile, to accommodate whatever screwdriving challenge the job-site might offer.

Kraftform Kompakt® - for both manual and machine operation.

Mobility and flexibility are the trend in our modern industrial world. Over 90 % of service technicians need tools for both manual and power screwdriving (rechargeable battery, electro or pneumatic screwdrivers) in their work.

In both service and assembly, more and more work must be carried out directly on the work-piece. This will also determine whether hand or power tools can be used for the job.

With the Kraftform Kompakt® series, the user is fully equipped for both kinds of screwdriving with only one set of tools.

The Kraftform Kompakt® series offers tools:

Because of this, the users' demands with regard to the design of the tools they choose has changed.
