

## Features

### Regulated Converters

- 2:1 and 4:1 Wide Input Voltage Ranges
- 1kVDC, 2kVDC & 3kVDC Isolation
- UL94V-0 Package Material
- Continuous Short Circuit Protection
- Low Noise
- No External Capacitor needed
- Efficiency to 83 %

#### Description

High power-density, an industrial temperature range of -40°C to +85°C and extra features like Remote-On-Off- control are just some of the characteristics of this converter, ideal for highly sophisticated industrial designs. The RS series is available with isolation of 2kV or 3kV by choosing option "/H2" or "/H3" in which case it is also ideal for medical applications which additionally require EN-60601-1 certification.

#### Selection Guide 5V, 12V, 24V and 48V Input Types

| Part Number        | Input Voltage Range (VDC)   | Rated Output Voltage (VDC) | Output Current at Full Load (mA) | Efficiency typ. (%) | Max Capacitive Load |
|--------------------|-----------------------------|----------------------------|----------------------------------|---------------------|---------------------|

No suffix is standard isolation (1kVDC) e.g., RS-0505S

\*add suffix /H2 or /H3 for 2kVDC or 3kVDC isolation, e.g., RS-0505S/H2, RS-0505DZ/H3

Notes

|         |                                                                                                                                                                                                                      |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Note 1: | Maximum capacitive load is defined as the capacitive load that will allow start up in under 1 second without damage to the converter                                                                                 |
| Note 2: | The RS series requires a minimum of 10% load on the output to maintain specified regulation. Operating under no-load conditions will not damage these devices; however, they may not meet all listed specifications. |

## Typical Characteristics

### RS-24xx

### RS-05xx types

## Package Style and Pinning (mm)

### 8 PIN SIP Package

### Single Output

### Dual Output

XX.X ± 0.5 mm  
XX.XX ± 0.25 mm

### Recommended Footprint Details

### Pin Connections

| Pin # | Single | Dual  |
|-------|--------|-------|
| 1     | -Vin   | -Vin  |
| 2     | +Vin   | +Vin  |
| 3     | CTRL   | CTRL  |
| 5     | NC     | NC    |
| 6     | +Vout  | +Vout |
| 7     | -Vout  | Com   |
| 8     | NC*    | -Vout |

NC = No Connection

NC\* = NC, but no external Connection allowed.

**Pin 8 (NC\*)** This pin is used internally and must have no external connection.

**Pin 5 (NC)** Not connected internally.

### Pin 3 (CTRL)

This pin provides an Off function which puts the converter into a low power mode. When the pin is 'high' the converter is OFF and when the pin is high 'Z' the converter is ON. There is no allowed low state for this pin.

## Application Examples

### ON/OFF CONTROL

I = 3V  
0 = 0.5V or GND

Remote ON/OFF

ON: open or high impedance

OFF: external 5~12 Vdc and 1N4148+ 68Ω resistor
