

SCR Zero Switching Relays

— NEW —

- ▶ Green LED Indicator
- ▶ Protective Touch Safe Cover
- ▶ Built-In MOV Protection
- ▶ Direct Copper Bonding and SMD Technology
- ▶ No Internal Mechanical Stress (No Potting)
- ▶ AC and/or DC Control Voltage
- ▶ Up to 100 Amp Switching Capability
- ▶ Up to 660 VAC Switching
- ▶ Up to 1600 Vp Non-Repetitive Voltage

Zero switching solid state relays offering up to 1600 Vp non-repetitive peak voltage. They provide high current carrying capabilities for operational voltages up to 660 VAC. Normally open, back-to-back SCR outputs are utilized in the output circuitry to reduce leakage current. UL recognized, CSA certified, CE compliant.

4.5-32 VDC Control Voltage

Low Cost Triac Output Relays

— NEW —

Economical zero switching triac output for less demanding resistive load applications. Relays feature LED indication and touch proof cover. Non-repetitive voltage up to 1200 Vp. UL recognized, CSA certified, CE compliant. 18-36 VAC/DC control voltage types are also available. Contact your local Allied sales representative.

4.5-32 VDC Control Voltage

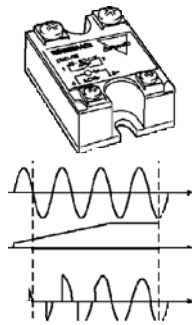

Stock No.	Mfr.'s Type	Line VAC	Amps	EACH

Phase Angle Fired Analog Switching Relays

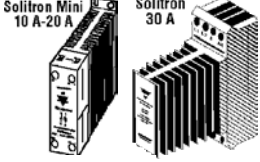

Ideally suited for "phase angle" control of resistive loads, such as heater bands or incandescent lamps. The relay switches off every time the current crosses zero and switches the load voltage proportionally with the applied analog control current. Back-to-back SCR output, up to 660 VAC, controlled by 4-20 mA DC. LED illumination is proportional to the input signal. UL recognized, CSA certified, CE compliant.

"Solitron" Solid State Contactor with Integrated Heat Sink

- ▶ User Friendly — Just Snap onto DIN Rail
- ▶ Ideal Alternative to Mercury Relays
- ▶ One or Two Pole Switching
- ▶ Zero Switching for Resistive/Motor Loads
- ▶ Built-In MOV Protection
- ▶ LED Indication
- ▶ AC and/or DC Control Voltage
- ▶ Up to 63 A Output Current
- ▶ Up to 660 VAC Switching
- ▶ Up to 1600 Vp Non-Repetitive Voltage

The new solid state switching trend — solid state relays with heat sinks integrated directly onto the relay. Provides an excellent alternative to (environmentally hazardous) mercury relays. Due to the higher rated output, the 30 and 50 amp versions feature front mounted heat sinks, which cool more efficiently than rear mounted heat sinks, (due to natural air convection within the panel). Higher surge current rated relays (90 A) for inductive loads are available. CE mark.

Single Pole, 5-24 VDC Control

3 Phase Zero Switching Relays

- ▶ Built-In MOVs and Protective Cover
- ▶ Bright LED Indication
- ▶ Unique Raised Back Plate
- ▶ Optimum Heat Dissipation
- ▶ AC and/or DC Control Voltage
- ▶ Up to 55 A, 530 VAC Switching
- ▶ Up to 1200 Vp Non-Repetitive Voltage

Three phase zero switching solid state relays for resistive loads (heater bands) and inductive loads. Optional pilot duty switch. Optional temperature limit switch, which monitors the back plate temperature. UL/CSA; CE marked.
