

## 115 Volt Vertical Power Strips

Don't wait for your power strip to be configured. Middle Atlantic Products offers a complete line of UL Listed power solutions.

Middle Atlantic Products power strips are in stock with:

- [15 amp power strips](#)
- [20 amp power strips](#)
- [High Amp power strips](#)
- isolated ground circuits
- single and dual circuits (with color-coded outlets for each circuit)
- multiple MOV surge and spike protection
- circuit breaker protection (non-protected strips are also available)
- multiple termination choices: cord with plug, metal flex with tails, or J-box

All Middle Atlantic Products power strips feature our unique mounting lances and quick clips, and have been engineered to attach to the rackrail brackets on all of our welded racks. Quick clips may also be attached to all of our wood racks, as well as to walls and other surfaces by using appropriate fasteners.

### High-Density 15 & 20 amp Slim Power Strips

New high-density power strips boast a unique feature. They contain a number of outlets that have been spaced to accommodate plug-in power supplies, resulting in no wasted outlets! Measuring 1-1/4" deep by 1-5/8" wide, these power strips provide maximum useability while taking up a minimum of space. Ships complete with 9' power cord, 15 Amp circuit breaker and mounting system.

### Included Mounting System

Included with all vertical power strips, our proprietary "quick-clip" mounting system provides fast and secure mounting. Once the quick-clips are fastened to the inside of your rack, the power strip is hung in place via a series of mounting lances found along its sides. These handy lances also double as cable tie points, allowing all AC cables to be neatly managed.

### Additional Mounting Brackets

Use our PB-5A brackets to mount Middle Atlantic Products power strips in our AXS and SLIM 5, RL, RLA and MK Series racks, or to the rackrail of any rack. To mount strips in our SR and DWR series wall racks, use PB-DWR brackets. PB-XS rackmounting power bracket mounts any **C** power strip between rackrail of any rack, includes cable management tie points.

Part #	Description
<b>PB-5A</b>	brackets to mount vertical power strips on rear rackrail (pair)
<b>PB-90</b>	brackets to mount vertical power strip so outlets face front or back of enclosure (pair)
<b>PB-DWR</b>	brackets to mount vertical power strips in DWR & SR Series wall racks (pair)
<b>PB-XS</b>	horizontally mount <b>C</b> power strips

PB-XS mounts PD-815SC and PD-815SC-NS power strips between rackrail

PB-90 mounts power so outlets face the front or back of the enclosure
