Improved performance, environmental resistance, and operability

BASIC PERFORMANCE

About four times more robust in tightening

As the sensor can be securely tightened, it does not get loose due to vibration or shock.

Long sensing range

GX-12MLU(B)/N12ML(B) feature 1.6 times longer sensing range than previous model [GX-12ML(B)]. It can be mounted at a sufficient distance from the object.

ENVIRONMENTAL RESISTANCE

Spatter-resistant type available DC 2-wire type

As the enclosure is entirely coated by fluorine resin, the sensor can be safely used at a place where welding spatters fly around. Both the pigtail cable and the mating cable are also spatter-resistant.

FUNCTIONS

Visible 2-color indicator

The normally open type [GX-(F)□U(-J)] is equipped with a 2-color indicator. (The normally closed type and GX-N = have the operation indicator

instead.)

The operation is easily observable from any direction because the entire sensor tail (transparent, GX-5SU(B): enclosure) lights up.

VARIETIES

Compact size: ø5.4 mm ø0.213 in

GX-5SU(B) is just 5.4 mm 0.213 in in diameter, the smallest in existing DC two-wire sensors. It saves you space.

Simple wiring

model that makes replacement easy

and quick.

DC 2-wire type

The wiring cost is considerably reduced as it is DC 2wire type. Further, each of GX-12M(L)U(B),

GX-18M(L)U(B), GX-30M(L)U(B) is available as a pigtailed

> Pigtailed type GX-□U(B)-J

APPLICATIONS

Detecting traveling aluminum pallets

It can reliably detect even aluminum pallets because of its long sensing range.

Controlling depth of drilling

By detecting the dog, the sensor decides the depth of the

Positioning object at welding station (GX-F_DU-J only)

It can be safely used even where welding sparks (spatter) fly around.

5 m 16.404 ft cable length type

5 m 16.404 ft cable length type (standard: 2 m 6.562 ft) is also available for cable type. When ordering this type, suffix "-C5" to the model No. (e.g.) 5 m 16.404 ft cable length type of GX-5SU is "GX-5SU-C5".

Pigtailed type

Pigtailed type (standard: cable type) is also available for DC 2-wire type.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) The maximum operation distance stands for the maximum distance for which the sensor can detect the standard sensing object.

The stable sensing range stands for the sensing range for which the sensor can stably detect the standard sensing object even if there is an ambient temperature drift and/or supply voltage fluctuation.

3) It is the leakage current when the output is in the OFF state.

4) The maximum load current varies depending on the ambient temperature. Refer to "I/O CIRCUIT AND WIRING DIAGRAMS" for more details.

5) When the cable is extended, the residual voltage becomes larger.

6) The given weight includes the weight of two nuts and one toothed lock washer.

PRECAUTIONS FOR PROPER USE

Refer to General precautions.

All models

 Never use this product as a sensing device for personnel protection.

 In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Mounting

• The tightening torque should be under the value given below.

Mounting with a set screw

• Tighten with the cup-point of a set screw (M4).

<non-thread< th=""><th>ed type></th><th>Moun</th><th>ting hole proc</th><th>ess dimension</th></non-thread<>	ed type>	Moun	ting hole proc	ess dimension

Note: Mount such that the nuts do not protrude from the threaded portion.

 The root truncation of the threads is shallow owing to strengthening of the sensors against tightening.
 When tapping holes on equipment to fix the sensors, the prepared holes must be value in the table below.

Model No.	Prepared hole

GX-12MU(B) GX-12MLU(B) GX-F12MU-J GX-N12M(B) GX-N12ML(B)	ø11.2 mm ø0.441 in

Distance from surrounding metal

 As metal around the sensor may affect the sensing performance, pay attention to the following points.

Influence of surrounding metal

The surrounding metal will affect the sensing performance.
 Keep the minimum distance specified in the table below.

Model No.	E (mm in)
GX-5SU(B)	4.5 0.177
GX-8MU(B)	4.5 0.177
GX-12MU(B) GX-F12MU-J GX-N12M(B)	8 0.315

GX-18MLU(B) GX-N18ML(B)	45 1.772
GX-30MLU(B) GX-N30ML(B)	75 2.953

Embedding of the sensor in metal

 Sensing range may decrease if the sensor is completely embedded in metal. Especially for the non-threaded type and the non-shielded type, keep the minimum distance specified in the table below.

Note: With the non-shielded type, the sensing range may vary depending on the position of the nuts.

DC 2-wire type

Wiring

• The sensor must be connected to a power supply via a load. If the sensor is connected to a power supply without a load, the short-circuit protection makes the sensor inoperable. (The output stays in the OFF state and the indicator does not light up.) In this case, rectify by connecting the power supply via a load. Now, the sensor becomes operable. Further, take care that if the power supply is connected with reverse polarity without a load, the sensor will get damaged.

• For series connection (AND circuit) or parallel connection (OR circuit) of sensors, take care of the following.

Series connection (AND circuit)

When all sensors are in the ON state, the load voltage VRL is given by: $VRL = VCC - n \times 3 (V)$

Vcc: supply voltage (24 V DC max.) n: number of sensors

Make sure that the load can work properly at this voltage.

Note: The output is generated normally even if the indicator does not light up properly.

• The residual voltage of the sensor is 3 V. Before connecting a relay as the load, take care of its actuation voltage. (Some 12 V relays may not be usable.)

2-color indicator [GX-(F) U(-J) only]

• When the sensing object is in the stable sensing range, the LED lights up in green, and when the sensing object is in the unstable sensing range, the LED lights up in orange. While the LED lights up in green, the sensing is performed stably without being affected by temperature drifts or voltage fluctuations.
