

Video Patch Plug Accessories

Switchcraft increases its line of video patching products with three new adaptor accessories. The dual looping plug series allows single or dual isolated video jacks to normal a signal path through. Designed for 75 Ohm applications, the looping plugs are available in Standard (WECο .090 pin) or Midsize (MiniWECο .048 pin).

Also available are the dual terminating plug series, which apply a 75 ohm resistor from center to ground for each port. The dual terminating plugs are also available in Standard and Midsize.

The single BNC to video plugs are convenient adapters to have around. The adapter allows a BNC output or input source such as a camera or monitor to be easily patched into a video jack so that a piece of gear can tap to or from the signal chain. Available in a Standard (WECο .090 pin) and a Midsize (MiniWECο .048 pin) to BNC female.

Broadcast Series

Video Plug Accessories: Standard and Midsize

Ordering Information

Part Number	Description
VSTP	Standard Dual Terminating Plug
VMTP	Midsize Dual Terminating Plug
VSLPX	Standard Video Looping Plug
VMLPX	Midsize Video Looping Plug
VPBNCF	BNC to Standard Video
