## MIL-DTL-83723, Series III, Pyle®

### TABLE OF CONTENTS

#### MIL-DTL-83723, Series III, Pyle®:

- Design Features, Customer Options, Manufacturer's Specifications. 363, 364
- Quick Reference of Choices - Threaded Styles . . . . . 365-367
- Quick Reference of Choices - Bayonet Styles . . . . . 368
- Quick Reference of Choices - Hermetic Receptacles, Threaded . . 369, 370
- Insert Availability, Alternate Keying Positions . . . . . 371
- Insert Arrangement Drawings . . . . . 372, 373
- How to Order - Military or Commercial . . . . . 374
- How to Order - Pyle Commercial Designed to Meet GE Specifications . 375
- How to Order - Boeing (BACC63CM/CN) or Pyle Comm. Equivalent . . 376
- How to Order - ASD Designation (EN997) . . . . . 377
- How to Order - Pyle Commercial Equivalents to ASD Designations/  
European Standards . . . . . 378
- How to Order - ESC10/11 for SBAC and Rolls Royce Standards . . . . 379
- How to Order - Pyle Commercial Equivalent to ESC11/  
European Specifications - Scoop-Proof only . . . . . 380
- How to Order - Hermetic, Military or Commercial . . . . . 381

#### Threaded Shell Styles:

- Square Flange Receptacle . . . . . 382
- Jam Nut (D-Hole Mount) Receptacle . . . . . 383
- Straight Plug & Non-Decoupling Plug. . . . . 384

#### Bayonet Shell Styles:

- Square Flange Receptacle . . . . . 385
- Jam Nut (D-Hole Mount) Receptacle . . . . . 386
- Straight Plug . . . . . 387

#### Hermetic Shell Styles:

- Square Flange Receptacle . . . . . 388
- Jam Nut (D-Hole Mount) Receptacle . . . . . 389
- Solder Mount/Weld Mount Receptacle . . . . . 390

#### Contacts, Sealing Plugs, Tools:

- Contacts, Sealing Plugs, Tools . . . . . 391-394

### MIL-DTL-83723 Series III, Pyle® Typical Markets:

- Military & Commercial Aviation
  - High Temperature Applications, Harsh Environments
- Military Vehicles

# MIL-DTL-83723, Series III, Pyle®

## Threaded or Bayonet, High Temp. Stainless Steel

Amphenol Aerospace offers the Pyle® Product line of MIL-DTL-83723\*, Series III Connectors.

Amphenol/Pyle 83723 Series III high temperature styles are capable of operation at 260° C/500°F. A 100% scoop-proof version of the high temperature connector is also available under specification ESC11/Pyle HTK Series. In addition, this connector series incorporates a unique sealing grommet that is capable of sealing on standard diameter wire as well as Kapton wire of reduced diameter.

The Pyle 83723 family provides connectors in environmental, firewall and hermetic classes that exceed the most stringent specification requirements.

MIL-DTL-83723, Series III Connectors are Available in a Wide Variety of Styles:

### THREADED STYLE CONNECTORS

- Stainless steel shells\*\* provide corrosion resistance
- Metal-to-metal bottoming
- Unique sealing grommet accepts a wide range of wire diameters
- Patented non-decoupling device in plugs - a self-locking clutch plate that provides greater resistance to decoupling than coupling during vibration

### BAYONET STYLE CONNECTORS

- Same quality features of the threaded style, but with 3 point bayonet coupling - quick turn to lock, visual confirmation of complete coupling

### HIGH TEMPERATURE STYLE CONNECTORS

- High temperature connector materials and contacts provide operation to 200°C and Firewall capability to 260°C
- Improved metal-to-metal bottoming design
- Unique sealing grommet accepts a wide range of wire diameters
- Improved 360° accessory orientation teeth provide greater performance under vibration
- Patented non-decoupling device (torque differential)
- Improved shell-to-shell conductivity with optional RFI grounding fingers
- Styles available that meet several European specifications, General Electric and Rolls Royce specifications
- Special Shell Geometry Styles available

### HERMETIC STYLE CONNECTORS

- Hermetic styles are available in threaded receptacles with solderwell or flat eyelet termination. PC Tail Designs are available on request.
- Designed for environmental moisture sealing with fused compression glass sealed inserts
- High temperature hermetics 200°C and 260°C Firewall

## Design Features (Threaded Style Shown)

The Amphenol MIL-DTL-83723, Series III family of connectors includes styles from Pyle National. These have proven technology for severe environments and are widely used in commercial and military aerospace markets. Amphenol/Pyle 83723 connectors incorporate many advantageous features, such as a unique threaded coupling mechanism that provides greater resistance to decoupling. This coupling mechanism eliminates the need for safety wiring and tends to couple during vibration - thus offering the user added assurance and a margin of safety.

### SERVICE RATINGS

| Service Rating | Recommended Operating AC Voltage at Sea Level | Test Voltage AC (RMS), 60 cps |            |            |             |
|----------------|-----------------------------------------------|-------------------------------|------------|------------|-------------|
|                |                                               | Sea Level                     | 50,000 ft. | 70,000 ft. | 110,000 ft. |
| I              | 600                                           | 1,500                         | 500        | 375        | 200         |

Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

\* MIL-DTL-83723 supersedes MIL-C-83723.

\*\* The Amphenol Pyle 83723 family is offered in stainless steel shell classes. See the Amphenol Matrix 83723 family for aluminum shell classes in the preceding section of this catalog.

# MIL-DTL-83723, Series III, Pyle®

## Manufacturer's Specifications

The Amphenol/Pyle® Product line of MIL-DTL-83723\*, Series III Connectors was developed for the higher operating temperatures inherent in today's high performance aircraft and aircraft engines.

**These connectors meet the performance requirements of the following manufacturer's specifications:**

- Boeing BACC63CM/CN\* Firewall
- European: ASD† EN2997
- General Electric: M50TF3564
- Rolls Royce/SBAC: ESC10 and ESC11

**ESC11**  
**Engine Connector**

\* For Classes A, R and W (aluminum shell types) - Amphenol supplies these in their Matrix 83723 family. See the preceding section of this catalog, 83723 III Matrix.

Square Flange Receptacle, Threaded, per European Stds.  
(Green Insert - High Temp 260°C;  
Blue insert - 200°C)

Commercial - Meet Society of British Aerospace Co./Rolls Royce Standards:

**ESC10 ( J0)**  
260°C Firewall (Classes KE, SE, YE),  
360° accessory teeth per MS3155  
**ESC11 ( J0)**  
260°C Firewall (Classes KE, SE, YE),  
Scoop-proof recessed pins,  
360° accessory teeth per MS3155

ESC10 & ESC11 also available in Hermetic square flange receptacles - See Hermetic quick ref. page 369.

ESC11 with Scoop-Proof (Recessed pins):

**HTK-17**  
Standard ESC11, Class K Firewall, Scoop-proof, Variations for Euro market specifications  
**HNK-17**  
Nickel finish, Class K Firewall Mating recept. has 'O' ring seal, Scoop-proof, Variations for Euro market specs  
**HSK-17**  
Same as HTK, except this is a special designator for Boeing Co.

\*\* BACC63CN supersedes BACC63BT.

See how to order pages 374-381 for complete part numbers.

Bayonet style square flange receptacles are shown on page 385.

|   |                                            |
|---|--------------------------------------------|
| G | Stainless steel, 200°C                     |
| K | Stainless steel, 200°C Firewall capability |

\* For Classes A, R and W (aluminum shell types) - Amphenol supplies these in their Matrix 83723 family. See the preceding section of this catalog, 83723 III Matrix.

### MIL-DTL-83723, SERIES III JAM NUT (D-HOLE MOUNT) RECEPTACLE, BAYONET COUPLING

Military: **M83723/73** with Sockets, Classes G, K

Military: **M83723/74** with Pins, Classes G, K

Commercial: **BY( )19**  
With 'O' ring seal, Classes G, K

Jam Nut  
(D-Hole Mount)  
Receptacle  
with Bayonet  
Coupling

### MIL-DTL-83723, SERIES III STRAIGHT PLUG, BAYONET COUPLING

Military: **M83723/75** with Sockets, Classes G, K

Military: **M83723/76** with Pins, Classes G, K

Commercial: **BY( )10**  
With 'O' ring seal, Classes G, K

Straight Plug  
with Bayonet  
Coupling

Bayonet coupling connectors are offered in Military 83723 and Commercial equivalent designations. See how to order page 374. They are not included in Boeing, GE, ASD and other European specified connectors. Shell size 28 is not available in Bayonet coupling connectors.

\* Special - consult Amphenol for availability.

\*\* Special Pyle with Matrix 83723 insert (ESC10 type, EN2997 Spec); consult Amphenol Aerospace for availability.

\*\*\* Boeing Qualified Arrangements (See Boeing How to Order page 376)

♦ 24-19 is a special ground plane insert with purchased size 12 Coax contacts; consult Amphenol for information.

♦♦ 24-46 is a special insert that accommodates size 8 twinax contacts with ground spring.

Size 8 and Size 12 cavities can accommodate Twinax or Coax contacts; consult Amphenol for information.

Sizes 20, 24 and 28 Hermetic; consult Amphenol Aerospace for availability.

Size 28 not available in Bayonet style.

### ALTERNATE KEYING POSITIONS (Rotation of key/keyway of shell)

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate keying positions are available as indicated in the chart below. The diagram shows the engaging view of a receptacle shell with keyways. The insert is rotated counter-clockwise relative to the center-line. Plug shells would be the opposite of this diagram.

In the "Normal insert position" (position N), the insert center line coincides with the center-line of the master key/keyway of the shell. In the "alternate keying positions" (positions 6, 7, 8, 9 and Y), the minor keys/keyways are positioned with reference to master key/keyway as indicated in the keying position table.

Shown is Engaging Face View of Receptacle Shell with Keyways (Plug Shell Keys would be Opposite)

### ALTERNATE KEYING POSITIONS OF SHELL

| <b>/73</b> | Bayonet, Jam Nut (D-Hole Mount) Recept., with sockets                  |
| <b>/74</b> | Bayonet, Jam Nut (D-Hole Mount) Recept., with pins                     |
| <b>/75</b> | Bayonet, Straight Plug, with sockets                                   |
| <b>/76</b> | Bayonet, Straight Plug, with pins                                      |
| <b>/82</b> | Threaded, Square Flange Receptacle, with sockets                       |
| <b>/83</b> | Threaded, Square Flange Receptacle, with pins                          |
| <b>/84</b> | Threaded, Jam Nut (D-Hole Mount) Recept., with sockets                 |
| <b>/85</b> | Threaded, Jam Nut (D-Hole Mount) Recept., with pins                    |
| <b>/86</b> | Threaded, Straight Plug, with sockets                                  |
| <b>/87</b> | Threaded, Straight Plug, with pins                                     |
| <b>/95</b> | Threaded, Non-Decoupling Plug, with sockets                            |
| <b>/96</b> | Threaded, Non-Decoupling Plug, with pins                               |
| <b>/97</b> | Threaded, Non-Decoupling Plug, with EMI Grounding spring, with sockets |
| <b>/98</b> | Threaded, Non-Decoupling Plug, with EMI Grounding spring, with pins    |

### Step 3. Select a Service Class

|          | Designates               |
|----------|--------------------------|
| <b>G</b> | Stainless Steel          |
| <b>K</b> | Stainless Steel Firewall |

Note: See Matrix 83723 styles for aluminum classes A, R and W.

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

(except size 28 is not available in Bayonet Style)

First number represents Shell Size, second number is the Insert Arrangement

### Step 5. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 6, 7, 8, 9 or Y for alternate keying positions. See page 371 for descriptions.

### Step 1. Select a Commercial Connector Style Designed to be Equivalent to M83723, Series III

|           | Designates                                |
|-----------|-------------------------------------------|
| <b>BT</b> | Threaded with 'O' ring seal in receptacle |
| <b>BY</b> | Bayonet with 'O' ring seal in receptacle  |

(How to Order Hermetic Styles is provided on page 381).

### Step 2. Select a Service Class

|          | Designates               |
|----------|--------------------------|
| <b>G</b> | Stainless steel          |
| <b>K</b> | Stainless steel Firewall |

Note: See Matrix 83723 styles for aluminum classes A, R and W.

### Step 3. Select a Shell Style

|             | Designates                                                                                           |
|-------------|------------------------------------------------------------------------------------------------------|
| <b>-10</b>  | Straight Plug, Bayonet coupling only                                                                 |
| <b>-11</b>  | Straight Plug, Threaded coupling only                                                                |
| <b>-12</b>  | Non-Decoupling Plug, Threaded coupling only                                                          |
| <b>-12F</b> | Modification 360° accessory teeth per MS3155, EMI Grounding Spring on Plug only. For /97 & /98 only. |
| <b>-17</b>  | Square Flange Receptacle                                                                             |
| <b>-19</b>  | Jam Nut (D-Hole Mount) Receptacle                                                                    |

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

(except size 28 is not available in Bayonet Style)

First number represents Shell Size, second number is the Insert Arrangement.

### Step 5. Select a Contact Type (Crimp)

|          | Designates      |
|----------|-----------------|
| <b>P</b> | Pin Contacts    |
| <b>S</b> | Socket Contacts |

### Step 6. Alternate Contact Finish or without Contacts

|          | Designates            |
|----------|-----------------------|
| <b>D</b> | Gold per SAE AS39029* |
| <b>E</b> | Without contacts      |

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Variations

Consult Amphenol Aerospace for information.

\*Supersedes MIL-C-39029

## How to Order – Pyle Commercial - Designed to Meet General Electric Specifications

|                                                                      | 1.                | 2.             | 3.                                         | 4.                                   | 5.              | 6.                                                 | 7.                                    | 8.          |
|----------------------------------------------------------------------|-------------------|----------------|--------------------------------------------|--------------------------------------|-----------------|----------------------------------------------------|---------------------------------------|-------------|

| <b>PYLE COMMERCIAL<br/>DESIGNED TO MEET<br/>G. E. SPECIFICATIONS</b> | <b>BJ</b>         | <b>-17</b>     | <b>E</b>                                   | <b>16-24</b>                         | <b>S</b>        | <b>D</b>                                           | <b>06</b>                             | <b>XXXX</b> |

### Step 1. Select a Commercial Connector Type Designed to Meet General Electric Specifications

|            | Designates                                                   |
|------------|--------------------------------------------------------------|
| <b>BJ</b>  | Threaded, Stainless Steel, Static/Dynamic Seal in receptacle |
| <b>BJ8</b> | Same as BJ except with Scoop-Proof Recessed pins             |
| <b>BN</b>  | Same as BJ except Electro-deposited Nickel Plated            |
| <b>BN8</b> | Same as BN except with Scoop-Proof Recessed pins             |
| <b>BNK</b> | Same as BN except Stainless Steel Firewall                   |

### Step 2. Select a Shell Style

|            | Designates                        |
|------------|-----------------------------------|
| <b>-10</b> | Bayonet Plug                      |
| <b>-11</b> | Threaded Straight Plug            |
| <b>-12</b> | Threaded Non-Decoupling Plug      |
| <b>-17</b> | Square Flange Receptacle          |
| <b>-19</b> | Jam Nut (D-Hole Mount) Receptacle |

### Step 3. Select a Shell Modification

|          | Designates                                                         |
|----------|--------------------------------------------------------------------|
| <b>E</b> | 360° Accessory Teeth per MS3155 Plug and Receptacle                |
| <b>F</b> | 360° Accessory Teeth per MS3155, EMI Grounding Spring on Plug only |
| <b>G</b> | 3 Accessory Teeth, EMI Grounding Spring on Plug only               |

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

First number represents Shell Size, second number is the Insert Arrangement.

### Step 5. Select a Contact Type (Crimp)

|          | Designates                     |
|----------|--------------------------------|
| <b>P</b> | Pin Contacts                   |
| <b>K</b> | #20 Pins with #18 crimpwell    |
| <b>S</b> | Socket Contacts                |
| <b>L</b> | #20 Sockets with #18 crimpwell |

### Step 6. Alternate Contact Finish or without Contacts

|          | Designates            |
|----------|-----------------------|
| <b>D</b> | Gold per SAE AS39029* |
| <b>E</b> | Without contacts      |

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Variations (Primarily Designed for General Electric)

|             | Designates                                                               |
|-------------|--------------------------------------------------------------------------|
| <b>Y176</b> | 260°C per G.E. M50TF3564, Class B, No Accessory Teeth                    |
| <b>Y185</b> | Older style with 200°C Capability - European market (Superseded by Y163) |
| <b>Y186</b> | 260°C Capability per G. E. M50TF3564 Class B**                           |
| <b>Y188</b> | 200°C Capability per G. E. M50TF3564 Class A**                           |

Another variation available with molding groove for potting - consult Amphenol Aerospace for ordering information.

\* Supersedes MIL-C-39029

\*\* Also see Hermetic styles that meet G.E. specification M50TF3564, Classes A & B on page 381.

# MIL-DTL-83723, Series III, Pyle®

### Step 1. Boeing Co. Designation

|               |                                                                                          |
|---------------|------------------------------------------------------------------------------------------|
| <b>BACC63</b> | Designates MIL-DTL-83723 Series III Boeing Designation BACC63CM/CN** Firewall Connectors |
|---------------|------------------------------------------------------------------------------------------|

(Refer to military specification slash sheet number.)

\*\* BACC63CM/CN supersedes BACC63BR/BT

### Step 2. Select a Connector Type

|           | Designates                                                   |
|-----------|--------------------------------------------------------------|
| <b>CM</b> | Threaded, Non-Decoupling Plug Stainless Steel Firewall       |
| <b>CN</b> | Threaded, Square Flange Receptacle, Stainless Steel Firewall |

### Step 3. Select a Boeing Specification Qualified Shell Size 12, 14, 16, 18, 20, 22, 24, 28

### Step 4. Select a Shell Modification

|          | Designates                                                         |
|----------|--------------------------------------------------------------------|
| <b>-</b> | Accessory Teeth per MIL-DTL-83723, Series III (normally 3 teeth)   |
| <b>B</b> | 360° Accessory Teeth per MS3155 Plug and Receptacle                |
| <b>D</b> | 360° Accessory Teeth per MS3155, EMI Grounding Spring on Plug only |

### Step 5. Select a Boeing Specification Qualified Insert Arrangement

12-03, 14-04, 14-07, 16-10, 18-14, 20-16, 22-19, 24-30, 28-42 (these incorporate Boeing approved contacts)

### Step 6. Select a Contact Type (Crimp)

|          | Designates                                   |
|----------|----------------------------------------------|
| <b>P</b> | Pin Contacts, Gold plate per SAE AS39029*    |
| <b>S</b> | Socket Contacts, Gold plate per SAE AS39029* |

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 6, 7, 8, 9 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Without Contacts Option

|          | Designates                                                                                                                                             |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>A</b> | Without Contacts and Sealing Plugs (Letter 'A' to be used on purchase orders only, and will not appear on connector as part of connector part number). |

\*Supersedes MIL-C-39029

### Step 1. Commercial Connector Type Designed to be Equivalent to Boeing BACC63

|            | Designates                                |
|------------|-------------------------------------------|
| <b>BSK</b> | Threaded with 'O' ring seal in receptacle |

### Step 2. Select a Shell Style

|            | Designates                                                   |
|------------|--------------------------------------------------------------|
| <b>-12</b> | Threaded, Non-Decoupling Plug Stainless Steel Firewall       |
| <b>-17</b> | Threaded, Square Flange Receptacle, Stainless Steel Firewall |

### Step 3. Select a Shell Modification

No designation needed for shells with accessory teeth per MIL-DTL-83723, Series III (normally 3 teeth).

|          | Designates                                                         |
|----------|--------------------------------------------------------------------|
| <b>E</b> | 360° Accessory Teeth per MS3155 Plug and Receptacle                |
| <b>F</b> | 360° Accessory Teeth per MS3155, EMI Grounding Spring on Plug only |

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

Shell Sizes 12, 14, 18, 20, 24, 28 are available.

Shell size and insert arrangement are written together. First number represents Shell Size, second number is the Insert Arrangement.

### Step 5. Select a Contact Type (Crimp)

|          | Designates      |
|----------|-----------------|
| <b>P</b> | Pin Contacts    |
| <b>S</b> | Socket Contacts |

### Step 6. Alternate Contact Finish or without Contacts

|          | Designates                         |
|----------|------------------------------------|
| <b>D</b> | Gold per SAE AS39029*              |
| <b>E</b> | Without contacts and sealing plugs |

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Omit for N for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Variation

|             | Designates                                                                    |
|-------------|-------------------------------------------------------------------------------|
| <b>Y126</b> | Contact Marking per MIL-DTL-83723/33 & /34 (Required with BACC63CM/CN Series) |

No variation suffix - connector will incorporate Mil-Spec AS39020 contacts

How to Order – ASD Designation

|                           | 1.             | 2.            | 3.          | 4.                            | 5.            | 6.                                 |
|---------------------------|----------------|---------------|-------------|-------------------------------|---------------|------------------------------------|
| MIL-DTL-83723, Series III | Connector Type | Service Class | Shell Style | Shell Size/Insert Arrangement | Contact Style | Alternate Keying Position of Shell |
| ASD DESIGNATION           | EN2997         | KE            | 6           | 16-24                         | F             | 6                                  |

Step 1. Select an ASD Designated/European Standards Connector Type

|        |                 |
|--------|-----------------|
|        | Designates      |
| EN2997 | ASD Designation |

Note: ASD supersedes AECMA Designation

Step 2. Select a Service Class

|     |                                                                |
|-----|----------------------------------------------------------------|
|     | Designates Standard Temperature Class                          |
| K   | Threaded, Stainless Steel, 200°C                               |
| S   | Threaded, Stainless Steel, EMI Grounding Spring on Plug, 200°C |
| Y*  | Stainless Steel Hermetic with Solderwell Contacts, 200°C       |
|     | Designates High Temperature Class                              |
| KE  | Threaded, Stainless Steel Firewall, 260°C                      |
| SE  | Threaded, Stainless Steel, EMI Grounding Spring on Plug, 260°C |
| YE* | Stainless Steel Hermetic with Solderwell Contacts, 260°C       |

\* No longer approved QPL supplier. Commercially equivalent is available, please contact a representative for more information.

Step 3. Select a Shell Style

|   |                                                  |
|---|--------------------------------------------------|
|   | Designates                                       |
| 0 | Threaded, Square Flange Receptacle               |
| 1 | Threaded, Solder Mount Receptacle, Hermetic only |
| 6 | Threaded Non-Decoupling Plug                     |
| 7 | Threaded Jam Nut (D-Hole Mount) Receptacle       |

Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

First number represents Shell Size, second number is the Insert Arrangement.

Step 5. Select a Contact Type (Crimp)

|   |                                |
|---|--------------------------------|
|   | Designates                     |
| M | Standard Pin Contacts          |
| C | #20 Pins with #18 crimpwell    |
| A | Pin Insert less Contacts       |
| F | Standard Socket Contacts       |
| D | #20 Sockets with #18 crimpwell |
| B | Socket Insert less Contacts    |

Step 6. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 6, 7, 8, 9 or Y for alternate keying positions. See page 371 for descriptions.

# MIL-DTL-83723, Series III, Pyle®

## How to Order – Pyle Commercial Equivalents to ASD Designation/European Standards

|                                                                                                               | 1.             | 2.            | 3.          | 4.                                   | 5.                             | 6.           | 7.                                           | 8.                             | 9.         |
|---------------------------------------------------------------------------------------------------------------|----------------|---------------|-------------|--------------------------------------|--------------------------------|--------------|----------------------------------------------|--------------------------------|------------|
|                                                                                                               | Connector Type | Service Class | Shell Style | Shell Modification (Accessory Teeth) | Shell Size/ Insert Arrangement | Contact Type | Alternate Contact Finish or Without Contacts | Alternate Keying Pos. of Shell | Variations |
| Amphenol® Pyle® MIL-DTL-83723, Series III<br><b>PYLE COMMERCIAL DESIGNED TO MEET ASD &amp; EUROPEAN STDS.</b> | <b>BT</b>      | <b>G</b>      | <b>-12</b>  | <b>E</b>                             | <b>18-14</b>                   | <b>P</b>     | <b>D</b>                                     | <b>08</b>                      | <b>XXX</b> |

### Step 1. Select a Commercial Connector Type Designed to Meet ASD/European Standards

|           | Designates                                                   |
|-----------|--------------------------------------------------------------|
| <b>BT</b> | Threaded with 'O' ring seal in receptacle                    |
| <b>BJ</b> | Threaded, Stainless Steel, Static/Dynamic Seal in receptacle |

### Step 2. Select a Service Class

|          | Designates               |
|----------|--------------------------|
| <b>G</b> | Stainless steel          |
| <b>K</b> | Stainless steel Firewall |

### Step 3. Select a Shell Style

|            | Designates                                  |
|------------|---------------------------------------------|
| <b>-12</b> | Threaded, Non-Decoupling Plug               |
| <b>-17</b> | Threaded, Square Flange Receptacle          |
| <b>-19</b> | Threaded, Jam Nut (D-Hole Mount) Receptacle |

### Step 4. Select a Shell Modification

No designation needed for shells with accessory teeth per MIL-DTL-83723, Series III (normally 3 teeth).

|          | Designates                                                         |
|----------|--------------------------------------------------------------------|
| <b>E</b> | 360° Accessory Teeth per MS3155 Plug and Receptacle                |
| <b>F</b> | 360° Accessory Teeth per MS3155, EMI Grounding Spring on Plug only |

### Step 5. Select a Shell Size & Insert Arrangement from chart on pg. 371.

First number represents Shell Size, second number is the Insert Arrangement.

### Step 6. Select a Contact Type (Crimp)

|          | Designates      |
|----------|-----------------|
| <b>P</b> | Pin Contacts    |
| <b>S</b> | Socket Contacts |

### Step 7. Alt. Contact Finish or without Contacts

|          | Designates            |
|----------|-----------------------|
| <b>D</b> | Gold per SAE AS39029* |
| <b>E</b> | Without contacts      |

### Step 8. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

### Step 9. Variations (Designed for Meeting European Specifications)

|             | Designates                           |
|-------------|--------------------------------------|
| <b>Y144</b> | 260°C Capability (Euro Market)       |
| <b>Y163</b> | 200°C Capability (Euro Market)       |
| <b>Y175</b> | Older designation superseded by Y144 |

## How to Order – ESC10/11 for SBAC and Rolls Royce Standards

|                                                               | 1.             | 2.            | 3.          | 4.                             | 5.           | 6.                                 | 7.         |
|---------------------------------------------------------------|----------------|---------------|-------------|--------------------------------|--------------|------------------------------------|------------|
| MIL-DTL-83723, Series III                                     | Connector Type | Service Class | Shell Style | Shell Size/ Insert Arrangement | Contact Type | Alternate Keying Position of Shell | Variations |
| MEETS SOCIETY OF BRITISH AEROSPACE CO./ ROLLS ROYCE STANDARDS | ESC10          | KE            | 0           | 16-24                          | S            | 6                                  | X          |

**Step 1.** Select a Connector Type that Meets European Specifications for Society of British Aerospace Co./Rolls Royce Standards

|       | Designates                                                                                |
|-------|-------------------------------------------------------------------------------------------|
| ESC10 | Threaded, Basic High Temperature Connector, 260°C Firewall                                |
| ESC11 | Threaded, High Temperature Connector (260°C Firewall) with 100% Scoop-Proof Recessed Pins |

### Step 2. Select a Service Class

|     | Designates High Temperature Class                                  |
|-----|--------------------------------------------------------------------|
| KE  | Threaded, Stainless Steel Firewall, 260°C                          |
| SE  | Threaded, Stainless Steel, EMI Grounding Spring on Plug, 260°C     |
| YE* | Threaded, Stainless Steel Hermetic with Solderwell Contacts, 260°C |

\* No longer approved QPL supplier. Commercially equivalent is available, please contact a representative for more information.

### Step 3. Select a Shell Style

|   | Designates                                                              |
|---|-------------------------------------------------------------------------|
| 0 | Threaded, Square Flange Receptacle with 360° Accessory Teeth per MS3155 |
| 1 | Threaded, Hermetic Solder Mount Receptacle                              |
| 2 | Threaded, Hermetic Square Flange Receptacle                             |
| 3 | Threaded, Hermetic Jam Nut (D-Hole Mount) Receptacle                    |
| 6 | Threaded, Non-Decoupling Plug with 360° Accessory Teeth per MS3155      |

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

First number represents Shell Size, second number is the Insert Arrangement.

### Step 5. Select a Contact Type (Crimp)

|   | Designates      |
|---|-----------------|
| P | Pin Contacts    |
| S | Socket Contacts |

All connectors are supplied without contacts except Shell Styles 1, 2 and 3

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 6, 7, 8, 9 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Variations

|           | Designates                     |
|-----------|--------------------------------|
| O (Alpha) | Basic Connector, no Variations |
| A         | Lockwire Holes on Plug         |

83723 III

PYLE

# MIL-DTL-83723, Series III, Pyle®

How to Order – Pyle Commercial Equivalent to ESC11  
European Specifications – Scoop-Proof only

|                           | 1.             | 2.          | 3.                             | 4.           | 5.             | 6.                                 | 7.         |
|---------------------------|----------------|-------------|--------------------------------|--------------|----------------|------------------------------------|------------|
| MIL-DTL-83723, Series III | Connector Type | Shell Style | Shell Size/ Insert Arrangement | Contact Type | Contact Finish | Alternate Keying Position of Shell | Variations |
| COMMERCIAL                | HTK            | 12          | 16-24                          | S            | D              | 06                                 | XXXX       |

## Step 1. Select a Commercial Connector Type Equivalent to ESC11 European Specifications

|     | Designates                                                                                                             |
|-----|------------------------------------------------------------------------------------------------------------------------|
| HTK | Threaded, Basic ESC-11, Class K (Choice of temperature rating 260° or 200° is in the Variations for this part number). |
| HNK | Same as HTK except Electroless Nickel Plated                                                                           |
| HSK | Same as HTK, except this is a special designator for Boeing Company                                                    |

## Step 2. Select a Shell Style

|     | Designates                                                       |
|-----|------------------------------------------------------------------|
| -12 | Threaded Non-Decoupling Plug with 100% Scoop-Proof Recessed Pins |
| -17 | Square Flange Receptacle with 100% Scoop-Proof Recessed Pins     |

## Step 3. Select a Shell Size & Insert Arrangement from chart on pg. 371.

Shell Sizes 12, 14, 18, 20, 24, 28 are available.  
Shell size and insert arrangement are written together. First number represents Shell Size, second number is the Insert Arrangement.

## Step 4. Select a Contact Type (Crimp)

|   | Designates      |
|---|-----------------|
| P | Pin Contacts    |
| S | Socket Contacts |

## Step 5. Select a Contact Finish or without Contacts

|   | Designates        |
|---|-------------------|
| D | Gold per AS39029* |
| E | Socket Contacts   |

Special High Temperature Contacts are another option - consult Amphenol Aerospace for ordering information.

## Step 6. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

## Step 7. Variations

|      | Designates |
|------|------------|
| Y144 | 260°C      |
| Y163 | 200°C      |

\*Supersedes MIL-C-39029

| <b>COMMERCIAL HERMETIC</b>                | <b>BTY</b>      | <b>-17</b>  | <b>16-24</b>                   | <b>S</b>     | <b>1</b>      | <b>D</b>                 | <b>06</b>                          | <b>XXXX</b> |

### Step 1. Military Connector Type

|               |                                                |
|---------------|------------------------------------------------|
| <b>M83723</b> | Designates MIL-DTL-83723 Series III Connectors |
|---------------|------------------------------------------------|

### Step 2. Select a Military Hermetic Connector Style

(Refer to military specification slash sheet number.)

|            | Designates                                           |
|------------|------------------------------------------------------|
| <b>/88</b> | Hermetic, Threaded Square Flange Receptacle          |
| <b>/89</b> | Hermetic, Threaded Jam Nut (D-Hole Mount) Receptacle |
| <b>/90</b> | Hermetic, Threaded Solder Mounted Receptacle         |

### Step 3. Select a Service Class

|          | Designates                                                 |
|----------|------------------------------------------------------------|
| <b>Y</b> | Hermetic, Stainless Steel, 200°C, with Solderwell Contacts |
| <b>H</b> | Hermetic, Tin Plated Carbon Steel, 150° C                  |

For availability of a Plated Steel Shell, consult Amphenol Aerospace.

### Step 4. Select a Shell Size & Insert Arrangement from chart on pg. 371.

(Except sizes 24 and 28 are not available in Hermetic Styles.)  
First number represents Shell Size, second number is the Insert Arrangement

### Step 5. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Use N for normal. Use 6, 7, 8, 9 or Y for alternate keying positions. See page 371 for descriptions.

### Step 1. Select a Commercial Hermetic Connector Style

|            | Designates                                                                                     |
|------------|------------------------------------------------------------------------------------------------|
| <b>BTY</b> | Hermetic, Threaded, Stainless Steel, with 'O' ring seal                                        |
| <b>BFY</b> | Hermetic, Threaded, Stainless Steel, with Static/Dynamic Seal                                  |
| <b>BNY</b> | Hermetic, Threaded, Stainless Steel, Electro-deposited Nickel plated, with Static/Dynamic Seal |

### Step 2. Select a Shell Style

|            | Designates                        |
|------------|-----------------------------------|
| <b>-17</b> | Square Flange Receptacle          |
| <b>-19</b> | Jam Nut (D-Hole Mount) Receptacle |
| <b>-14</b> | Solder Mounted Receptacle         |

### Step 3. Select a Shell Size & Insert Arrangement from chart on pg. 371.

(Except sizes 24 and 28 are not available in Hermetic Styles.)  
First number represents Shell Size, second number is the Insert Arrangement

### Step 4. Select a Contact Type (Crimp)

|          | Designates   |
|----------|--------------|
| <b>P</b> | Pin Contacts |

### Step 5. Select a Contact Style

|          | Designates                          |
|----------|-------------------------------------|
| <b>1</b> | Solderwell Contacts (Mil-Spec Type) |
| <b>4</b> | Eyelet Contacts                     |

### Step 6. Alternate Contact Finish

|          | Designates                            |
|----------|---------------------------------------|
| <b>D</b> | .000050 (per MIL-DTL-83723, III) Gold |
| <b>V</b> | .000100 Gold                          |

### Step 7. Select an Alternate Keying Position - Rotation of master key/keyway of shell.

Omit for normal. Use 06, 07, 08, 09 or Y for alternate keying positions. See page 371 for descriptions.

### Step 8. Variations

|             | Designates                                   |
|-------------|----------------------------------------------|
| <b>Y144</b> | 260°C Capability (Euro Market)               |
| <b>Y163</b> | 200°C Capability (Euro Market)               |
| <b>Y186</b> | 260°C Capability per G.E. M50TF3564, Class B |
| <b>Y188</b> | 200°C Capability per G.E. M50TF3564, Class A |

# MIL-DTL-83723, Series III, Pyle®

## Square Flange Receptacle, Threaded Coupling

### PART #

**M83723/82 / M83723/83**  
**BT( )-17**  
**BJ/BJ8/BN/BN8/BNK-17**  
**BACC63CN**  
**BSK-17**

\* Amphenol part number for insertion/removal tool supersedes Pyle number

### BACKSHELLS

The section of this catalog called "Backshells" covers the backshells for MIL-DTL-83723, Series III Pyle connectors that are provided through Amphenol PCD. Please refer to this section for:

- Backshells for Connector Family "J", which includes MIL-DTL-26482 (Series II), MIL-DTL-5015 (MS3400), MIL-DTL-83723 (Series I & III).

# MIL-DTL-83723, Series III, Pyle®

## Shielded Contacts, Thermocouple Contacts, Wire Sealing Information

### SHIELDED CONCENTRIC TWINAX CONTACTS

| Contact Size | Cable Accommodation     | Concentric Twinax Pin |
|--------------|-------------------------|-----------------------|
| #8 Twinax    | M17/176-00002           | BA-46T08-LD           |
| #8 Twinax    | PAN 6421 or JN1060ZB002 | BA-46TA08-LD          |

CONCENTRIC  
TWINAX PIN

Non-MS part; no color bands.

| Contact Size | Cable Accommodation     | Concentric Twinax Socket |
|--------------|-------------------------|--------------------------|
| #8 Twinax    | M17/176-00002           | BA-47T08-LD              |
| #8 Twinax    | PAN 6421 or JN1060ZB002 | BA-47TA08-LD             |

CONCENTRIC  
TWINAX SOCKET

Non-MS part; no color bands.

Concentric Twinax contacts are designed for protection from magnetic and electrostatic interference including nuclear electromagnetic pulse. Consult Amphenol for other size twinax and coax contacts available for use in MIL-DTL-83723, Series III Pyle connectors.

### THERMOCOUPLE - PIN PART NUMBERS / COLOR BANDS

| Contact Size | Material | Thermocouple Pin Pyle Part Number | Thermocouple Pin Color Bands |          |          |
