

Black Knight™ Series

#8150 Black Knight™ M12

Talk about tough. Pelican's M12 is cast from the same hi-grade aluminum as racing engine blocks. Beat it, drop it, kick it, the M12 is built to withstand the hard knocks that come with the job. And you will know it's a Pelican by the unique faceted design. A rechargeable 4 C Nicad battery stick produces a super bright pre-focused Xenon beam. The result is 151 lumens of powerful, bright white light. The sure-grip vinyl sheath resists chemicals and extreme temperatures. A push button on/off switch operates easily, even when wearing thick gloves.

The M12 includes a fast charger that fully charges the Nicad battery stick in 2 to 3 hours, preparing the M12 for a full day's work. The durable rechargeable Nicad battery pack can take a charge over 1,000 times. The charger base can be mounted horizontally or upright and an LED indicator illuminates when the M12 is fully charged. Options include a direct wiring kit (for mounting the M12 in vehicles), 12V adapter and 110V transformer.

The Pelican M12 Aluminum. Metal rules.

CANDLEPOWER	LUMENS	WEIGHT W/BATTERIES	BATTERIES
