

0603 Ceramic Chip Capacitor Kit

Johanson Dielectrics, Inc. offer a variety of multi-layer chip capacitor sample kits for proto-type design work. Each kit is grouped by type, size, or voltage and contains a selection of popular values and tolerances. The chips are individually packaged in labeled plastic compartments for easy access. The general range of NP0, X7R, Y5V kit contents is described below.

0603 CERAMIC CHIP CAPACITOR KIT				P/N: S-0603
1400 piece sample assortment of selected values from 1.0pF to 0.1μF				
Chip Size	Voltage Rating	Dielectric	Capacitance Range	Qty / Value
0603	50 VDC - 16 VDC	NP0, X7R, Y5V	10pF to 0.22μF	50 pcs
