

ModICE

Modular Integrated Connector Enclosures

Cinch's Modular Integrated Connector Enclosures offer high quality sealed packaging solutions for rugged electronic control module applications. The Cinch 1.5mm SHS system is the base interconnect technology.

The ModICE product line consists of two distinct enclosure sizes and 6 header configurations allowing 18, 30, 48 and 60 I/O. Snap-in header simplifies module assembly. Integrated ferrite filtering, integrated heat sink and vented enclosures are available options.

Product Specification

Operating Temperature

-40°C to +85°C

Contact Resistance

< 10 mΩ

Insulation Resistance

>1000 MΩ

Sealing

IP65, IP66, IP67, IP69K

Temperature Life

1008 Hrs @ 125°C

Current Cycling

500 Hrs @ 10 Amp

500 cycles 45 min ON – 15 min OFF

Vibration

10 to 2000 to 10 Hz with 15 g's peak level

Shock

50 g's – 20 pulses

Salt Spray

96 Hrs

Temperature Humidity Cycling

320 Hrs

40 – 8 Hrs cycles -40°C to +85°C @ 85%RH to +125°C

Fluid Resistance

Resists to most fluids used in industrial applications

RoHs Compliant

Consult factory for options

Enclosure - SE

Without heat sink	P/N: 581 01 30 043
With 1 heat sink	P/N: 581 01 30 042
Use with spring plate	P/N: 581 00 00 021
With 2 heat sink	P/N: 581 01 30 041
Use with spring plate	P/N: 581 00 00 021
	P/N: 581 00 00 020

Header - SE

18 I/O P/N: **581 01 18 032**

30 I/O P/N: **581 01 30 044**

48 I/O P/N: **581 01 48 005**

Without Ferrites

18 I/O P/N: **581 01 18 033**

30 I/O P/N: **581 01 30 046**

48 I/O P/N: **581 01 48 007**

With Ferrites

Mating SHS Harness Connectors

48 I/O P/N: **581 01 18 023**

P/N: **581 01 30 029**

30 I/O P/N: **581 01 30 029**

18 I/O P/N: **581 01 18 023**

Enclosure - LE

Without heat sink P/N: **581 01 60 033**

With 1 heat sink P/N: **581 01 60 032**

Use with spring plate P/N: **581 00 00 021**

With 2 heat sink P/N: **581 01 60 031**

Use with spring plate P/N: **581 00 00 021**

P/N: **581 00 00 020**

Header - LE

30 I/O P/N: **581 01 30 045**

48 I/O P/N: **581 01 48 006**

60 I/O P/N: **581 01 60 005**

Without Ferrites

30 I/O P/N: **581 01 30 051**

48 I/O P/N: **581 01 48 008**

60 I/O P/N: **581 01 60 006**

With Ferrites

Mating SHS Harness Connectors

60 I/O P/N: **581 01 30 028**

P/N: **581 01 30 029**

48 I/O P/N: **581 01 30 029**

P/N: **581 01 18 023**

30 I/O P/N: **581 01 30 029**

Enclosure Assembly

Mount header to PCB

Spring Plates (sold separately)

Soldering Process

- Process PCB
- For heat sink options:
 - Install heat sink spring plates
 - Apply conductive medium to mosfets

Assemble header/board into enclosure
Push to lock and seal

Proven Excellence

For over 70 years, Cinch has been a reliable supplier of a variety of quality connector products to various industries. We are a multi-national manufacturer with manufacturing facilities in the U.S., U.K. and Mexico.

Cinch has applied its extensive expertise in interconnection technology to engineer and manufacture connectors of various complexities using state-of-the-art technology and tooling. Mechanical design is accomplished using Pro/E® 3D solid modeling and AutoCAD® supported by nonlinear and linear Finite Element Analysis, and Mold Flow software.

Our engineers utilize in-house capabilities in high frequency interconnect simulation, SPICE model generation and high frequency testing to develop the optimum product.

All products are validated in Cinch's First Article, mechanical, electrical, and environmental test facilities ensuring the finished products meet our customers' most stringent specifications.

Simply, your connectors are manufactured in state-of-the-art facilities that are committed to customer satisfaction and continuous improvement.

1.5 mm Sealed Header System

The SHS product family is designed to perform on electronic control modules that must function in extreme environmental conditions commonly found on commercial and off-road vehicles and equipment. SHS headers and harness connectors were developed on a highly reliable 1.5mm terminal platform.
