IRF6893MPbF
IRF6893MTRPbF

DirectFET®*plus* MOSFET with Schottky Diode ②

- RoHs Compliant Containing No Lead and Bromide ①
- Integrated Monolithic Schottky Diode
- Low Profile (<0.7 mm)
- Dual Sided Cooling Compatible ①
- Low Package Inductance
- Optimized for High Frequency Switching ①
- Ideal for CPU Core DC-DC Converters
- Optimized for Sync. FET socket of Sync. Buck Converter①
- Low Conduction and Switching Losses
- Compatible with existing Surface Mount Techniques ①
- 100% Rg tested
- Footprint compatible to DirectFET™

Typical values (unless otherwise specified)

V_{DSS}	V_{GS}	$R_{DS(on)}$	$R_{DS(on)}$
25V max	±16V max	1.2mΩ@ 10V	1.6mΩ@ 4.5V

Description

The IRF6893MPbF combines the latest HEXFET® Power MOSFET Silicon technology with the advanced DirectFET™ packaging to achieve the lowest on-state resistance in a package that has the footprint of a SO-8 and less than 0.7 mm profile. The DirectFET package is compatible with existing layout geometries used in power applications, PCB assembly equipment and vapor phase, infra-red or convection soldering techniques. Application note AN-1035 is followed regarding the manufacturing methods and processes. The DirectFET package allows dual sided cooling to maximize thermal transfer in power systems, improving previous best thermal resistance by 80%.

The IRF6893MPbF balances industry leading on-state resistance while minimizing gate charge along with low gate resistance to reduce both conduction and switching losses. This part contains an integrated Schottky diode to reduce the Qrr of the body drain diode further reducing the losses in a Synchronous Buck circuit. The reduced losses make this product ideal for high frequency/high efficiency DC-DC converters that power high current loads such as the latest generation of microprocessors. The IRF6893MPbF has been optimized for parameters that are critical in synchronous buck converter's Sync FET sockets.

Absolute Maximum Ratings

	Parameter	Max.	Units
V_{DS}	Drain-to-Source Voltage	25	V
V_{GS}	Gate-to-Source Voltage	±16	
I_D @ T_A = 25°C	Continuous Drain Current, V_{GS} @ 10V ③	29	A
I_D @ T_A = 70°C	Continuous Drain Current, V_{GS} @ 10V ③	23	
I_D @ T_C = 25°C	Continuous Drain Current, V_{GS} @ 10V ④	168	
I_{DM}	Pulsed Drain Current ⑤	230	
E_{AS}	Single Pulse Avalanche Energy ⑥	370	mJ
I_{AR}	Avalanche Current ⑤	23	A
