— Water Resistant

For outline drawings refer to page 53.

‡ Intermittent Duty Cycle = 30 seconds “on” maximum and 6 minutes “off”

* Terminal Type: “4” = Isolated Coil, “6” = Isolated Coil Automotive, “7” = Latching Contacts

** Inrush Current: Current applied within the first 1/2 second of contact closure

Engineering Design Data

D.C. Type	Coil Rating Nominal Magnetic Coil Rating (Watts)	Operation in % of Nom. Coil Voltage Rating		Breakdown Voltages All Terminals - 60 Hz RMS			Contact Material		Electrical Life		Mechanical Life		Max. Oper. Temp. °F
		Pick-up	Max. Safe Operate	Opposite Polarity	Open Contacts Same Polarity	To Ground	Power	Pilot	Oper. At Rated Load	Oper. Per Min.	Oper. At No Load	Oper. Per Min.	
120	-	75%	110%	500	500	500	Copper Silver Alloy	-	10,000 50,000	2 2	100,000 100,000	30 30	150

Temperature Range

- Intermittent Duty: -20°F to 150°F
- Continuous Duty: -20°F to 120°F

Power (approximate)

- Continuous 8.1 watts
- Intermittent 14.4 watts

Terminations

- Contacts: 5/16" - 24 studs, UNF - 2A thread
- Coil: #10-32, UNF - 2A thread

Recommended Mounting

- Coil terminals up or horizontal

Hardware Torque Specification

- Contact Terminal: 45-55 inch-lbs.
- Coil Terminal: 12-18 inch-lbs.
- **Caution: A back up wrench *must* be used to hold the bottom nut stationary**

Type 120 Custom Design Capabilities

- Coil Voltages 6VDC through 48VDC
- 1/4" Contact Studs
- 1/4" Q.C. Coil Terminals
- U.L. 94-VO rated case material
- Please complete application data form on page 95 of this section

Note: Caution must be used in coil selection for use in 12 volt systems where battery charging may expose coil to continuous, higher-than-rated voltage. Stancor will not be responsible for consequences of misapplied solenoids.

Terminal Type 3 – Grounded Coil to Bracket

Terminal Type 6 – Delphi Connection (STD Bracket)

Terminal Type 4 – Isolated Coil (L Bracket)

Terminal Type 7 – Latching Coil (L Bracket)

Terminal Type 5 – Grounded Coil with Q.C. Terminal
