

## Features

- Rugged construction
- Ease of installation
- Indoor and outdoor versions
- Convenient ground attachment
- Designed to IEEE-465 and Telcordia standards
-  Listed per UL497 (File E53117)

This series is currently available but not recommended for new designs.

## Applications

- Telecommunications
- Residential
- Commercial

## F Series Surge Protection Assemblies

Bourns® F-Series surge protection assemblies provide binding post, ground point and surge protection using Model 2022-60-A Gas Discharge Tube (GDT) well protectors with 1/2" x 20 thread. These former Emerson Network Power units are available in counts from one to twenty-four lines. Outdoor models offer secure and weather resistant enclosures for Telco service for residential or commercial installations. Their high insulation resistance and low moisture absorption assure excellent transmission quality. Their modular design allows some models to be combined for higher line counts. These units feature grommets for convenient cable access and generous working space for wire management.
