## DAYLIGHT FLUORESCENT TUBES

Daylight Fluorescent Tubes are ideal for lighting larger spaces such as studios and offices. These fluorescent tubes (Philips Colour 95 Series) provide excellent daylight simulation (5000K) and feature superb colour rendering (RA>95), as well as economy in energy consumption. They have a life-time expectancy of about 6000 h.

They are easily interchangeable with equivalent length of standard tubes in standard fittings with a glow starter.

Available in 2, 4 and 5 foot length.

### Technical Details

Type	Nom. length mm	Nom. diameter mm	Lamp voltage V	Lamp current A	Caps	Colour temperature K	Luminous flux* lm	Luminance cd/cm <sup>2</sup>
2ft TL'D 18W	590	26	59	0.37	G13	5000	1000	0.70
4ft TL'D 36W	1200	26	103	0.44	G.13	5000	2350	0.80
5ft TL'D 58W	1500	26	111	0.68	G13	5000	3750	1.00

\*) after 100 burning hours
