ADC1415S125F2 🚫 Obsolete

ADC1415S125F2 demo board; SPI, Regulators on board; LVDS output only SAMTEC connector

IDT's ADC demonstration board is suitable for dynamic performance evaluations from low to high IF configuration. A Data acquisition board can be used to easily analyze the ADC performances in the design and prototyping phase.

Features

- Single power supply (on-board regulators)
- SMA connector for clock and analog inputs signal
- CMOS (buffered outputs)
