

Bobbin Mounts - Type VD (Male - Female)

The Type VD Bobbin Mounts are designed to be used on a wide range of applications, and can be used in compression or shear.

They are manufactured from Natural Rubber in a variety of hardnesses to suit the application, and have zinc plated steel end sections with either welded or cold formed threads.

This range comes with a Male thread on one end, and a Female thread on the opposite end which is captive to avoid compromise to the integrity or functionality of the Rubber section.
