Tflex™ 200 V0 Series Thermal Gap Filler

SOFT, FREESTANDING GAP FILLER

Tflex™ 200 V0 is a very soft, freestanding gap filler that is more compliant than most other gap fillers. Combining good thermal conductivity of 1.1 W/mK with high conformability, this gap filler produces low thermal resistance. The alumina filler allows the product to remain a cost effective solution where moderate thermal performance is acceptable.

Naturally tacky and not requiring additional adhesive coating, the Tflex™ 200 V0 can inhibit thermal performance. This gap filler is both electrically insulating and stable from -40°C to 160°C and meets UL 94 V0 rating.

FEATURES AND BENEFITS

- Soft and compressible for low stress applications
- Naturally tacky needing no further adhesive coating
- 1.1 W/mK thermal conductivity
- Available in thicknesses from 0.010" (0.25mm) to 0.200" (5.0mm)

APPLICATIONS

- Cooling components to the chassis or frame
- High speed mass storage drives
- RDRAM memory modules
- Heat pipe thermal solutions
- Automotive engine control units
- Wireless communication hardware

STANDARD SHEET SIZES

9" x 9" (229mm x 229mm) Tflex™ 200V0 may be die cut into individual shapes. Pressure sensitive adhesive is not applicable for Tflex™ products.

REINFORCEMENT

0.020" (0.51mm) and 0.030" (0.762mm) are fiberglass reinforced.

Data for design engineer guidance only. Observed performance varies in application. Engineers are reminded to test the material in application.
