1Gb Serial NAND: MT29F1G01AAADDH4

Specifications

Bits/Cell: SLC Brand: Micron Bus Width: x1 Chip Enable: Single Component Density: 1Gb

Fab: Micron Family: NAND Flash Flash Voltage: 3.3V

Generation (primary): First Generation I/O: Common 1/0 Channels: 1 Interface: Serial Manufacturer: Micron Mode Operation: Single Die Operating Temp: 00 to +700 Package: VFBGA

Package Type: Lead Free Part Status Code: Production

Pin Count: 63-ball RoHS: Yes

Show External: Yes Show WebDEV: No Technology: Serial NAND

Voltage: 3.3V

Data Sheets

🔼 Datasheet: NAND SPI 1Gb

Data Sheet M68A ...

Rev. Date: 11/2011, File Size:

618.32 KB

Certifications

🥦 RoHS Certificate of Compliance.pdf

🥦 China RoHS Certificate.pdf

For more than 30 years, Micron's teams of dreamers, visionaries, and scientists have redefined innovation—designing and building some of the world's most advanced memory and semiconductor technologies. We develop the technologies that transform what's possible. In fact, you likely use our memory every day—in products from computing, networking, and server applications, to mobile, embedded, consumer, automotive, and industrial designs. As one of the most prolific patent holders in the world we continually rethink, recast, and advance new ideas to bring innovation to broader markets and find ways our technology can inspire new applications or make fundamental improvements to existing designs. Our roots are in memory, the core strength of our business. As we look toward the future, we'll continue to build on our past achievements by leveraging the synergies between our core memory business and diversified products and technologies that help drive innovation and growth in new markets:
