The re-flow condition / taping dimensions are explained on P197, 198 of our catalog.

(): Please use AK, RK or J2 to indicate terminal type.

Note : 1. Do not use reflow soldering when cell voltage is above 0.3 V.

2. When the capacitor is being used in a high temperature and high humidity environment for a long period, and will not affect any electrical characteristics of the capacitor.

3: EP series is a small capacitor that developed for the RTC backup of cellular phone. Therefore, there is a possibility that it will not be able to back up in short time depend on using condition. Please contact us before you use it
