Wireless RF Development Kit Test Cards

Silicon Labs offers a number of test cards to aid engineers in developing RF links using designs similar to those they will use in their final board layouts. Designs include those focused on regional regulations and features such as antenna diversity.

A wide selection of EZRadioPRO® sub-GHz RF transceiver test cards are available to support the MSC_F930_PDK development kit.

Wireless MCU test cards are also available to support the Si1000DK and Si1010DK development kits.

Select your product family:

EZRadio	EZRadioPRO	Wireless MCUs
---------	------------	---------------

EZRadio

Part Number	Type	Freq.	Antenna Configuration	Price (USD)	Buy	Download
4313-T-B1_B_ANY	Si4313 RX	240-960 MHz	50 Ohm	\$50
