

441 *No-Skive* Hi-Pac Compact Hose

- One wire braid construction
– two wire braids performance
- 125 °C working temperature
- Compatible with 46 and 48 series
No-Skive fittings

441 – *No-Skive* Hi-Pac Compact Hose

SAE 100 R2 working pressures

SAE 100 R16 bending radii

Parker's upgraded 441 hose provides 2 wire braided performance with only 1 high quality wire braid and is now approved for a working temperature of 125 °C.

The Hi-Pac construction of the hose braid allows the technical characteristics of an SAE 100 R16 hose to be met, but offers higher flexibility and therefore improved ease of installation in machines or equipment.

The 441 hose is ideal for many industrial and mobile applications, with typical usage seen on agricultural machines or in power steering circuits.

Features:

- 1 wire braid construction – 2 wire braids performance
- 125° C working temperature*
- Compatible with both 46 and 48 series *No-Skive* fittings
- *No-Skive* design eliminates the need to remove the cover before crimping

441 – *No-Skive* 1-Layer Compact Hose

for small bend radii

SAE 100 R16, exceeds SAE 100 R2

Primary Applications/Restrictions

Many industrial and mobile applications, with typical usage seen on agricultural machines or in power steering circuits
