Ideal for home and office use

Home use:
• Store all your spreadsheets, documents, presentations on one central location
• Data accessible for everyone in the office network or remote securely via internet
• Make a backup of all important business documents and files
• Share data between computers and networks

Office use:
• Store all your digital photo's, music, movies, games on one central location
• Access your data from any PC in your home network, and remote, securely via the internet
• Make a backup of all your important documents, music and video's

Stylish and cost-effective network storage solution

Computer networks these days are not limited to big offices with a lot of employees. More and more people at home or in small offices have a computer network. With the recent programmes, applications and data files becoming larger and larger, the need for additional storage space is more present than ever before!
Freecom offers you the perfect storage upgrade for your network, the new Network Drive XS. Simply connect the Network Drive XS to your router or switch, run the easy to use configuration wizard, and have instant access to the drive from any PC within your network. It can even be configured to be accessed via the internet, so your data is available for you from anywhere in the world, without your PC needed to be switched on!
The included configuration assistant will guide you to set up the drive and security options the way you want it. For increased flexibility, you can also use the Network Drive as a standalone USB 2.0 hard drive, you can connect it to any PC.
Again Freecom has created a storage solution from a consumer's perspective, where convenience, design and quality are key factors.
