Auto/Isolation Transformers

- Features

 - ▶ Three Conductor Line Cord and Receptacle — Some Items Available with Leadwires
 - ▶ GIS and GISD Series Have Electrostatic Shields Connected to Case, Core and to Third Conductor of Cord and Receptacle
 - ▶ EI Laminations
 - ▶ Heavy Duty Welded Plate Ensures Mounting Stability
- Applications

 - ▶ Computer Protection
 - ▶ Dental Chairs
 - ▶ Electrical Appliances
 - ▶ Lab Test Equipment
 - ▶ Incubator Ovens
 - ▶ LED Signs
 - ▶ Office Copiers and Printers

Auto transformers have one winding that is tapped to achieve specific output voltage. They provide no electrical isolation in a circuit. Auto transformers are typically smaller than their isolation equivalent. Isolation transformers have two separate windings with an electrostatic shield between them to provide complete electrical isolation from the source. Auto/isolation transformers can be used in most countries by using an input adapter plug, see International Adapter Plugs section below for Stancor's high quality line. **Specifications.** Input Cord Length: 5½' min. Output Cord Length: 8' min. Input Voltages: 115/230 VAC. Operating Temperature: -40° to 105°C. Output Voltage: 115/230 VAC. Power Range: 0.6-1500 VA.

*Has leadwires. †Has electrostatic shield on separate leadwire (not grounded). ‡Secondary is two separate 115 V windings. •Primary is two separate 115 V windings.

International Adapter Plugs

Grounding adapters, ideal for use on electrical/electronic equipment on the CEE-7 SCHUKO outlet configuration. The use of these adapters reduces the need for expensive and difficult-to-obtain foreign type power cords and cord sets, as they provide a fast, easy means of connecting equipment to European outlets. **European to American — Fig. B** Allows interface from CEE-7 SCHUKO plugs to NEMA 6-15R grounding outlets. 928-9952. ADT-30120. 1-49.....EACH 19.55

American to European — Fig. A Allows interface from NEMA 6-15P plugs to CEE-7 SCHUKO grounding outlets. 928-9951. ADT-30100. 1-49.....EACH 10.36

European to United Kingdom — Fig. C Allows interface from CEE-7 SCHUKO plugs to U.K. 13 A, 250 V receptacles. 928-9953. ADT-30140. 1-49.....EACH 18.08

Energy Limiting Transformers

- Features

 - ▶ Heavy Duty Welded Mounting Plate Provides Mounting Stability
 - ▶ Rigid ¼" Q.C. Terminals Provide Ease of Installation
 - ▶ Rated for Continuous Duty
 - ▶ Windings and Internal Connections Enclosed with Insulating Plastic Cover for Safety
 - ▶ Non-Concentric Windings Reduce Size and Cost and Improve Manufacturability
- Applications

 - ▶ Commercial Dryers
 - ▶ Deep Fryers
 - ▶ Greenhouse Controls
 - ▶ Home Environmental Systems
 - ▶ Security Systems
 - ▶ Video Games
 - ▶ Automatic Doors
 - ▶ Solar Heating Units

Meet UL safety specifications. Split bobbin winding reduces capacitive coupling and eliminates need for electrostatic shield. Broad range of input voltage combinations cover most HVAC applications. 40AV power rating eliminates need for multiple parts to cover lower power requirements. All primaries 50/60 Hz.
