Part Number : TPFLXIC015 - HexWax USB-DAQ-SS

USB-DAQ is a low cost data logging system. In normal operation it is powered by a battery cell and logs data as required. In has analog, digital, comparator and counter inputs. When plugged into a USB port, USB-DAQ appears on the PC like a removable disk. The user can specify data logging requirements in a text file, and access logged data from a CSV (comma separated values) file. No software or firmware programming is required. USB-DAQ uses the Mass Storage Device (MSD) USB profile. It does not require USB driver installation, and so is immediately compatible with present and future Windows, Linux and Mac operating systems. USB-DAQ-SS is the 20-pin SSOP version suggestedfor production purposes.

Flexipanel is a trusted 3rd Party Tool Provider
