Technical drawing of a rectangular plate with six rectangular slots. The plate has a width of 16.1 ± 0.3 and a height of $12.6 - 0.3 + 0.05$. There are six rectangular slots arranged in two rows of three. The distance between the centerlines of the two rows is 6 ± 0.2 . The width of each slot is 5 ± 0.2 , and the total width of the six slots is $2 \times 5 = 10 \pm 0.2$. The plate is subjected to a vertical force A at the top and bottom edges and a horizontal force B at the left and right edges.
