

FEATURES

- 20 μ A to 20mA Operating Range
- Guaranteed 1% Initial Voltage Tolerance
- Guaranteed 1 Ω Dynamic Impedance
- Very Low Power Consumption

APPLICATIONS

- Portable Meter References
- Portable Test Instruments
- Battery-Operated Systems
- Panel Meters
- Current Loop Instrumentation

DESCRIPTION

The LM185-2.5 is a two-terminal band gap reference diode that has been designed for applications which require precision performance with micropower operation. The device provides guaranteed operation specifications at currents as low as 20 μ A. The nominal voltage is 2.5V with both 1% and 2% tolerances available. Some additional features are: maximum dynamic impedance of 1 Ω , low noise and excellent stability over time and temperature. The advanced design, processing and testing techniques make Linear's LM185-2.5 a superior choice over previous designs. A circuit for cold junction compensation of a thermocouple is shown below.

For applications requiring guaranteed temperature drift, see the LT1034 data sheet.

LT, LTC and LT are registered trademarks of Linear Technology Corporation.

TYPICAL APPLICATION

Thermocouple Cold Junction Compensator

Reverse Voltage Change

LM185-2.5/
LM285-2.5/LM385-2.5

ABSOLUTE MAXIMUM RATINGS (Note 1)

Reverse Breakdown Current	30mA	Storage Temperature Range	
Forward Current	10mA	LM185-2.5 (OBSOLETE)	–65°C to 150°C
Operating Temperature Range		LM285-2.5	–65°C to 150°C
LM185-2.5 (OBSOLETE)	–55°C to 125°C	LM385-2.5	–65°C to 150°C
LM285-2.5	–40°C to 85°C	Lead Temperature (Soldering, 10 sec.)	300°C
LM385-2.5	0°C to 70°C

e_n	Wide Band Noise (RMS)	$10\text{Hz} \leq f \leq 10\text{kHz}$, $I_R = 100\mu\text{A}$		120			120			μV
$\frac{\Delta V_Z}{\Delta \text{Time}}$	Long Term Stability	$T_A = 25^\circ\text{C} \pm 0.1^\circ\text{C}$, $I_R = 100\mu\text{A}$		20			20			ppm/kHr

Note 1: Absolute Maximum Ratings are those values beyond which the life of a device may be impaired.

Note 2: All specifications are for $T_A = 25^\circ\text{C}$ unless otherwise noted. For the LM185-2.5 $T_{\text{MIN}} = -55^\circ\text{C}$ and $T_{\text{MAX}} = 125^\circ\text{C}$. For LM285-2.5, $T_{\text{MIN}} = -40^\circ\text{C}$ and $T_{\text{MAX}} = 85^\circ\text{C}$. For LM385-2.5, $T_{\text{MIN}} = 0^\circ\text{C}$ and $T_{\text{MAX}} = 70^\circ\text{C}$.

Note 3: For very low initial tolerance, consult LT1004 data sheet. The LT1004 is a low cost, pin for pin substitution device. For guaranteed temperature coefficient consult the LT1034-2.5 data sheet.

Note 4: Guaranteed but not tested.
