

SLCD-61N4

Solderable Planar Photodiode

Features

- Visible to IR spectral irradiance range
- High reliability
- Oxide passivation
- Low capacitance, high speed

Description

The Silonex series of silicon solderable planar photodiodes feature low cost, high reliability, and linear short circuit current over a wide range of illumination. These devices are widely used for light sensing and power generation because of their stability and high efficiency. They are particularly suited to power conversion applications due to their low internal impedance, relatively high shunt impedance, and stability.
