

Metallized Polypropylene Film Capacitor

series (For High Frequency and Large Current Applications)

- Ideal for high frequency applications due to a metallized polypropylene film dielectric which exhibits superior operative characteristics with minimal loss at high frequency.
- Electrode has minimal inductance because of non-inductive construction.
- Finished by inner dipping with liquid epoxy resin and outer coating with flame-retardant epoxy resin, those double coating gives superior characteristics against moisture.
- Adapted to the RoHS directive (2002/95/EC).

Applications

- High frequency & large current circuit applications (resonant circuit, charge & discharge circuit & etc.)
