

TORCOFIX K / K US

Robust torque wrench with square drive and integrated ratchet-head function for controlled bi-directional tightening.

Working accuracy: $\pm 3\%$ tolerance of scale set torque. Includes test certificate according to DIN EN ISO 6789. Serial number on the wrench and on the certificate for unambiguous product identification, traceable to national standards.

Scale: Easily readable dual scale (N-m / lbf-in / lbf-ft) well protected under a window with a magnifying-glass effect. The torque setting is readable on the scale or, more particularly, on the scale in combination with the scale ring.

Micrometer scale: Optimised shape, stable scale frame with red-shaded micrometer scale ring. Model-dependent intervals of 0.25; 0.1 or 0.025 N-m allow very accurate settings.

Lighweight and reliable: Locking button enables reliable locking of the torque setting.

Chrome-plated ratchet head: All 1/4" - 3/8" square drives of the TORCOFIX K-series have a black plastic cap - also referred to as a mushroom head. This mushroom head prevents an unintentional pulling out of the whole square drive when changing the nut socket.

Automatic actuation: The TORCOFIX actuates with a clear tactile impulse and audible signal and is immediately ready for operation again.

Robust steel tube: With high corrosion protection, chrome-plated, silk-metal.

Handgrip with a user aid: Black plastic handgrip, new ergonomically enhanced shape, with an indentation in the middle of the handgrip. User aid and reference points for calibration.

TORCOFIX K

4549

TORQUE WRENCH TORCOFIX K 1-50 N-m / 0.75-37 lbf-ft

Use:

- Controlled screw tightening in the most widely used range of 1 - 50 N-m / 0.75 - 37 lbf-ft
- For use in almost all industrial manufacturing areas

Features:

- Classified to DIN EN ISO 6789:2003 Type II Class A, with a factory certificate. Working accuracy: +/- 3 % tolerance of scale set torque. The specification of the standard (+/- 4 %) is exceeded.
- Adjustable torque wrench with square drive and integrated ratchet function for controlled bi-directional tightening
- 1/4", 3/8" interchangeable mushroom head with ball locking device as per DIN 3120 - A 6.3 or A 10, similar to ISO 1174
- With certificate acc. to DIN EN ISO 6789, traceable via in-house DKD laboratory to national standards
- Release system triggers a tactile and audible signal
- Sturdy, satin chrome-plated tubular steel design, with chrome-plated ratchet head and high-quality plastic parts
- Dual scale N-m and lbf-ft below a window with a magnifying glass effect
- Magnifying glass with marking for minimum paralaxe errors allows a high degree of safety when setting the requisite torque value
- Additional micrometre scale for setting interim values
- Ergonomically shaped, convenient black plastic handgrip, with an indentation in the middle as a calibration aid

4549-G

TORQUE WRENCH SET TORCOFIX K 1-50 N-m / 0.75-37 lbf-ft

- The TORCOFIX K as a practical tool set
- Most-widely-used tools in a robust sheet-metal case
- Clearly organised - everything always ready to hand
- With foam-material inlay modules (on request, these can be customised or extended individually)

MAGIC 4550 - MAGIC 4551

Torque wrench TORCOFIX K

1-850 N·m / 0.75-630 lbf·ft

- Robust, silk-matt chrome-plated steel tube construction
- With chrome-plated ratchet head and glass-fibre-reinforced plastic parts
- Integrated ratchet function, with interchangeable mushroom head, push through square drive (up from no. 4550-40)
- For controlled bi-directional tightening by simply switching the square
- Classified to DIN EN ISO 6789:2003 Type II Class A, with a factory certificate. Working accuracy: +/- 3% tolerance of scale set torque. The specification of the standard (+/- 4%) is exceeded.
