OUR PRODUCTS

- Actuators
- Air Cylinders
- Air Fittings & Connectors
- Check Valves
- DOT Compliant Fittings
- Filters
- Fittings - One Touch
- Flow Controls

FREE Ground Shipping Orders over \$300 in the U.S.

Serial interface unit EX500 is capable of controlling up to 64 solenoids, and is compatible with SV1000/2000/3000/4000, VQC1000/2000/4000 valves. The EX500 makes it possible to connect up to 4 valve manifolds with up to 16 solenoids each. Available protocols include DeviceNet, CC-Link, Profibus-DP and Allen-Bradley Remote I/O.

- GW system, 4 branches
- Valve and input unit manifolds can be connected around the GW unit
- Compatible with 64-digital-outputs and 64-digital-inputs
- GW unit, input unit manifold: IP65
- Valve manifold including SI unit: IP67
