

PICkit Low Pin Count Demo Board with PIC16F690

Order code: DM164120-1

The DM164120-1 is a small demo board with a PIC16F690 on board and a small prototype area. Use it with a PICkit 2 to program your code via the 6-pin ICSP header on the board. The kit also includes two bare PCB boards for those interested in customizing their development, and samples of PIC12F617, PIC16F1823, and PIC18F14K22. The populated board gets bundled with the PICkit 2, when you order the DV164120, only the two bare boards are not included.
