Elapsed Time Indicators (ETI)

**CRAMER
MOTORS®**

Model 635 Shown

Models 635 & 636

The Cramer line of ETIs are used to record the amount of "on-time" operation for industrial and commercial grade equipment. Resettable and Non-Resettable versions are available either in round or square bezel, displayed in tenths of a minute or hour.

Applications Include:

- Indicating, monitoring and recording a process where the time used is required
- Recording "on-time" usage of machinery for billing purposes
- Preventive maintenance for machinery or equipment

Features:

- Large, easy-to-read numbers
- Rugged design
- Continuous duty
- Tamper proof
- Permanently lubricated
- Square or round bezels

Model 635:

Non-Resettable is recommended when tamper proofing is required to record total "on-time" not resettable to zero.

Model 636:

Resettable is available in seconds, minutes and hours.

Specifications:
