

These same terminals are available in larger, bulk packaging at substantial savings. Add 1 to the Allied Stock No. to get the same part in bulk.

Vinyl Insulated Ring — Insulation Support

STA-KON terminals and tools exceed test specifications requirements of military, UL and CSA. These ring terminals are insulated with a PVC insulation sleeve of extra length to give protection and relieve bending stress at wire's flex point. Brazed seam barrel is serrated to obtain high pull-out value. Terminal is made of high conductivity electrolytic copper, electro-tin plated. Insulation material is color coded.

Nylon Insulated Ring — Insulation Grip

Self-insulated with high dielectric-strength nylon sleeves, these ring terminals are recommended for temperatures up to 105°C. An inner bronze insulation grip sleeve lengthens the flexing radius of the conductor and eliminates conductor creep. The nylon jacket is color-coded.

Non-Insulated Ring

These non-insulated ring terminals are made of electrolytic copper for high conductivity and have a brazed seam barrel which provides maximum tensile strength. The wire barrel is serrated which increases grip on wire.
