

**HiQ-CBR Series, C0G Dielectric, Low ESR****6.3 – 500 VDC, 1 MHz – 50 GHz (RF & Microwave)****Overview**

KEMET's CBR Series surface mount multilayer ceramic capacitors (MLCCs) in C0G dielectric feature a robust and exceptionally stable copper electrode dielectric system that offers excellent low loss performance (high Q). These devices provide extremely low ESR and high self-resonance characteristics, and are well-suited for resonant circuit applications or those where Q and stability of capacitance characteristics are required. CBR Series capacitors exhibit no change in capacitance with respect to time and voltage, and boast a negligible change in capacitance with

reference to ambient temperature. Capacitance change is limited to  $\pm 30$  ppm/°C from  $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ .

CBR Series devices are suitable for many circuit applications including RF power amplifiers, mixers, oscillators, low noise amplifiers, filter networks, antenna tuning, timing circuits, delay lines, and MRI imaging coils.

**Benefits**

- High Q and low ESR
- High SRF
- High thermal stability
- 1 MHz to 50 GHz frequency range
- Operating temperature range of  $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$
- Base metal electrode (BME) dielectric system
- Pb-free and RoHS compliant
- 0201, 0402, 0603, and 0805 case sizes (inches)
- DC voltage ratings of 6.3 V, 10 V, 25 V, 50 V, 100 V, 200 V, 250 V, and 500 V
- Capacitance offerings ranging from 0.1 pF up to 100 pF

**Ordering Information**

| CBR    | 02                                               | C                     | 330                                                                                                                                       | F                                                                                                                                 | 9                                                                                                 | G          | A                 | C                  |                                        |

<sup>1</sup> When ordering CBR Series devices, a "suffix" or "C-Spec" is not required to indicate a 7" reel packaging option. CBR devices are only available and shipped on 7" reels (paper tape). Bulk bag and cassette packaging options are not available. Please contact KEMET if you have a specific, non-standard packaging requirement.

## Benefits cont'd

- Available capacitance tolerances of  $\pm 0.05$  pF,  $\pm 0.1$  pF,  $\pm 0.25$  pF,  $\pm 0.5$  pF,  $\pm 1\%$ ,  $\pm 2\%$ , and  $\pm 5\%$
- No piezoelectric noise
- No capacitance change with respect to applied rated DC voltage
- Negligible capacitance change with respect to temperature
- No capacitance decay with time
- Non-polar device, minimizing installation concerns
- 100% pure matte tin-plated termination finish allowing for excellent solderability

## Applications

Typical applications include critical timing, tuning, bypass, coupling, feedback, filtering, impedance matching and DC blocking.

Field applications include wireless and cellular base stations, wireless LAN, subscriber-based wireless services, wireless broadcast equipment, satellite communications, RF power amplifier (PA) modules, filters, voltage-controlled oscillators (VCOs), PAs, matching networks, RF modules, satellite communications and medical electronics.

## Qualification

RF and microwave products are subject to internal qualification. Details regarding test methods and conditions are referenced in Table 4, Performance & Reliability.

## Environmental Compliance

Pb-free and RoHS compliant.

## Dimensions – Millimeters (Inches)

## Electrical Parameters/Characteristics

| Item                                                                | Parameters/Characteristics                                                                       |
|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Operating Temperature Range:                                        | -55°C to +125°C                                                                                  |
| Capacitance Change with Reference to +25°C and 0 VDC Applied (TCC): | 0 ±30 ppm/°C (0 ±60 ppm/°C for 0201 case size product ≥ 22 pF)                                   |
| Aging Rate (Maximum % Capacitance Loss/Decade Hour):                | 0%                                                                                               |
| <sup>1</sup> Dielectric Withstanding Voltage (DWV):                 | See Dielectric Withstanding Voltage Table (5±1 seconds and charge/discharge not exceeding 50 mA) |
| <sup>2</sup> Quality Factor (Q):                                    | ≥ 1,000 for capacitance values ≥ 30 pF<br>≥ 400 + 20°C for capacitance values < 30 pF            |
| <sup>3</sup> Insulation Resistance (IR) Limit at 25°C:              | 10 GΩ minimum (rated voltage applied for 120±5 seconds)                                          |

<sup>1</sup> DWV is the voltage a capacitor can withstand (survive) for a short period of time. It exceeds the nominal and continuous working voltage of the capacitor.

<sup>2</sup> Capacitance and quality factor (Q) measured at 1 MHz ±100 kHz and 1.0 ±0.2 Vrms.

<sup>3</sup> To obtain IR limit, divide MΩ-μF value by the capacitance and compare to GΩ limit. Select the lower of the two limits.

Note: When measuring capacitance it is important to ensure the set voltage level is held constant. The HP4284 & Agilent E4980 have a feature known as Automatic Level Control (ALC). The ALC feature should be switched to "ON."

## Dielectric Withstanding Voltage Table

| Rated Voltage (VDC) | ≤100 V | 200 V | 250 V | 500 V |
|---------------------|--------|-------|-------|-------|
| DWV                 | 250%   | 200%  | 200%  | 150%  |

**Density Level A:** For low-density product applications. Recommended for wave solder applications and provides a wider process window for reflow solder processes. KEMET only recommends wave soldering of 0603(1608) and 0805 (2012) case sizes.

**Density Level B:** For products with a moderate level of component density. Provides a robust solder attachment condition for reflow solder processes.

**Density Level C:** For high component density product applications. Before adapting the minimum land pattern variations the user should perform qualification testing based on the conditions outlined in IPC Standard 7351 (IPC-7351).

Image below based on Density Level B for an EIA 1608 case size.

## Soldering Process

### Recommended Soldering Technique:

- Solder wave or solder reflow for 0603 and 0805 case sizes
- 0201 and 0402 case sizes are limited to solder reflow only

### Recommended Soldering Profile:

- KEMET recommends following the guidelines outlined in IPC/JEDEC J-STD-020

### Recommended Solder Alloys:

| Alloy   | Composition              | Solidus | Liquidous |
|---------|--------------------------|---------|-----------|
| In50    | 50 In, 50 Pb             | 180°C   | 209°C     |
| In52    | 52 In, 48 Sn             | 118°C   | 118°C     |
| Sn62    | 62.5 Sn, 36.1 Pb, 1.4 Ag | 179°C   | 179°C     |
| Sn63    | 63 Sn, 37 Pb             | 183°C   | 183°C     |
| Pb-Free | 95.5 Sn, 3.8 Ag, 0.7 Cu  | 217°C   | 217°C     |
| Hi-Temp | 5 Sn, 93.5 Pb, 1.5 Ag    | 296°C   | 301°C     |
| Sn5     | 5 Sn, 95 Pb              | 308°C   | 312°C     |

**Table 4 – Performance & Reliability: Test Methods & Conditions**

| Stress                                                                           | Test or Inspection Method                                                                                                                                                                                                                                         | Requirements                                                                                                                                                                                      |             |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                |                |                                  |

## Storage and Handling

Ceramic chip capacitors should be stored in normal working environments. While the chips themselves are quite robust in other environments, solderability will be degraded by exposure to high temperatures, high humidity, corrosive atmospheres, and long term storage. In addition, packaging materials will be degraded by high temperature—reels may soften or warp and tape peel force may increase. KEMET recommends that maximum storage temperature not exceed 40°C and maximum storage humidity not exceed 70% relative humidity. Temperature fluctuations should be minimized to avoid condensation on the parts and atmospheres should be free of chlorine and sulfur bearing compounds. For optimized solderability chip stock should be used promptly, preferably within 1.5 years of receipt.

## Construction

## Marking

CBR series devices are supplied unmarked.

If you require marked product, please contact KEMET for availability of a laser-marked option.

## Tape & Reel Packaging Information

KEMET offers RF and Microwave Multilayer Ceramic Chip Capacitors packaged in 8 mm tape on 7" reels. This packaging system is compatible with all tape-fed automatic pick and place systems.

**Table 5 – Carrier Tape Configuration (mm)**

| EIA Case Size | Tape Size (W)* | Lead Space (P <sub>1</sub> )* |
|---------------|----------------|-------------------------------|
| 0201 – 0402   | 8              | 2                             |
| 0603 – 1210   | 8              | 4                             |

\*Refer to Figure 1 for W and P<sub>1</sub> carrier tape reference locations.

\*Refer to Table 6 for tolerance specifications.

2. The tape with or without components shall pass around R without damage (see Figure 3).

## Packaging Information Performance Notes

- 1. Cover Tape Break Force:** 1.0 Kg minimum.
- 2. Cover Tape Peel Strength:** The total peel strength of the cover tape from the carrier tape shall be:

| Tape Width   | Peel Strength                    |
|--------------|----------------------------------|
| 8 mm         | 0.1 to 1.0 Newton (10 to 100 gf) |
| 12 and 16 mm | 0.1 to 1.3 Newton (10 to 130 gf) |

The direction of the pull shall be opposite the direction of the carrier tape travel. The pull angle of the carrier tape shall be 165° to 180° from the plane of the carrier tape. During peeling, the carrier and/or cover tape shall be pulled at a velocity of 300 ±10 mm/minute.

- 3. Labeling:** Bar code labeling (standard or custom) shall be on the side of the reel opposite the sprocket holes. Refer to EIA Standards 556 and 624.

## Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed.

All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.
