Series 61

Comprehensive. Intuitive and versatile.

https://eao.com/de/61

61 Information about the Series

Key advantages

- Wide, modular Series
- Modern design
- Range of switching elements and ease of mounting
- Custom marking possible
- Internationally recognised and approved series

Typical application areas

- Machinery
- Measurement and control engineering
- Process engineering (air conditioning systems and heating technology)
- Public transportation
- Laboratory instruments

Functions

- Pushbutton
- Illuminated pushbutton
- Mushroom-head pushbutton
- Selector switch
- Keylock switch
- Indicator
- Buzzer
- Potentiometer
- Stop switch
- Emergency stop switch

Design

- Flush
- Raised

IP front protection

- IP65
- IP66/IP67/IP69K (Emergency Stop)

Mounting cut-outs

- Ø 16.2 mm
- Ø 22.3 mm
- 21.2 mm x 21.2 mm
- 21.2 mm x 27.2 mm

Raitings

- 42 VAC (100 mA)
- 250 VAC (5 A)

Terminal

- Soldering terminal
- Screw terminal
- PCB (with PCB plug-in base)
- Cable

Lens Material

- Aluminium
- Plastic

Markings

- Engraving
- Laser marking
- Hot stamping
- Film insert/marking plate
- Pad printing
- Screen print

Approvals

- CB (IEC 61058)
- CB (IEC 60947)
- CSA
- ENEC (EN 61058)
- CQC
- CENELEC (IEC 60947-5-1)
- DNV GL (previously Germanischer Lloyd)
- GOST
- UL
- NFF

Conformities

- CE
- 2014/35/EU (LVD)
- 2011/65/EU (RoHS)

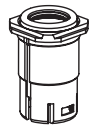
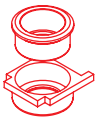
Pushbutton round, IP65

Equipment consisting of (schematic overview)

Lens — Page 759



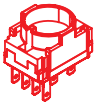
Actuator



Front bezel set — Page 763

Anti-twist ring — Page 776

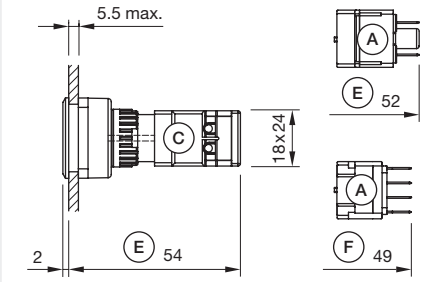
Fixing nut



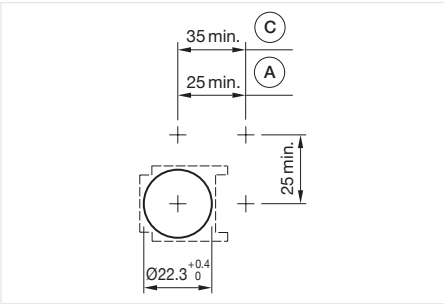
Switching element — Page 767

Each Part Number listed below includes all the black components shown in the 3D-drawing.

To obtain a complete unit, please select the red components from the pages shown.



Dimensions [mm]
A = Plug-in terminal 2.8 mm x 0.5 mm
C = Screw terminal
E = Slow-make switching element
F = Snap-action switching element



Mounting cut-outs [mm]
A = Solder/Plug-in terminal 2.8 mm x 0.5 mm
C = Screw terminal

Product can differ from the current configuration.

Actuator, Front dimension Ø 25 mm

Switching action	Housing colour	Housing material	Product attributes	Part No.	Wiring diagram
Momentary	Black	Plastic		61-1100.0	72
Maintained	Black	Plastic		61-1200.0	73
Maintained or momentary	Black	Plastic	Convertible from momentary to maintained action	61-1300.0	72

A = Terminals (rear side)
B = Conductor colour of flat ribbon cable
C = a = blue, b = red, c = yellow

Compact, robust, reliable.
The Series 61 E-Stop compact.

UL-certified – safety in a compact design for handheld control units.

- Very low back panel depth (21.2 mm)
- High front protection IP69K and IP67
- Robust mono-block design
- Mechanically decoupled triggering
- Optional illumination available
- Up to three switching elements

Compact, robust, reliable.
The Series 61 E-Stop compact.

UL-certified – safety in a compact design for a wide variety of applications.

- Very low back panel depth (21.2 mm)
- High front protection IP69K and IP67
- Robust mono-block design
- Mechanically decoupled triggering
- Optional illumination available
- Up to three switching elements

Additional information

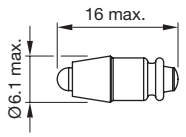
- Due to high surface temperatures, the series resistor must not be soldered directly to the terminals of the equipment (use a terminal plate)
- When using AC/DC types with AC operation, slight flickering can occur
- The luminous intensity stated is for when used with DC
- Electrical and optical data are measured at 25 °C
- The specified versions are built with a protection diode (halve wave rectifier) in series and the LED
- Luminosity and wave length variations caused by LED manufacturing processes may cause slight differences regarding the illumination. The customer has to decide what resistor shall be used to the LED
- Where supply voltages are over 48 V, a voltage-reduction element (external protective series resistor) must be used.
- Keep to the country specific safety instructions



Dimensions [mm]

Tool set

Material	Part No.
metal / plastic	K61-999.100

Additional information

- Consists of lens remover, lamp-and LED remover, mounting tool and dismantling tool

Actuator with snap-action switching element

Switching system

Self-cleaning, double-break snap-action switching system with contact opening width 2 mm x 0.5 mm (switch with small contact opening width as per EN IEC 61058-1).

The switching elements are optionally equipped with the following switching functions
One to three normally open (NO) or normally closed (NC), or any combination of NO and NC plus connections for T1 3/4 LED or lamp.

The number of switching elements cannot exceed three.
The switching elements provided for the 3-position switch actuators are equipped with max. 2 NC or 2 NO or any combination. The number of switching elements cannot exceed two.

Material

Lens
Raised mounting Plastic, as per UL 94 HB,
flush mounting Plastic, as per UL 94 V0, or Aluminium anodized

Front bezel
Plastic, as per UL 94 V0, or Aluminium anodized

Material of contact

Actuator with slow-make switching element

Switching system

Double-break slow-make system, contact opening width 2 x 1.5 mm, with 2 x 2 contact points per switching element.

NC-contact elements in the slow-make elements fulfill requirements of switches with forced opening as per EN/IEC 60947-5-12.17.

The slow-make elements are optionally obtainable with the following switching functions 1 NO or 2 NO, 1 NC or 2 NC, 1 NO + 1 NC.

Material

Lens
Raised mounting Plastic, as per UL 94 HB,
Flush mounting Plastic, as per UL 94 V0, or Aluminium anodized

Front bezel
Plastic, as per UL 94 V0, or Aluminium anodized

Material of contact
Silver or gold (specified for operation for low level switching)

Switching element
Plastic, as per UL 94 V0

Actuator housing
Plastic, as per UL 94 V0, self-extinguishing

61 Marking

General notes

1. Engraving

In addition to the most commonly used world languages, in DIN1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish. Red, blue and black lenses are filled with white colour. Other colour lenses are filled in black. Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

2. Hot stamping

For larger series it is worth considering markings by means of hot stamping. We will pleased to advise you.

3. Film inserts

Instead of using engraving the lenses can be fitted with transparent film inserts, as an alternative. In the case of use of a smoke-black lens the fitted film becomes readable only if the lamp is on. The film thickness is 0.2 mm. For lenses Ø 24 mm and Ø 25 mm with Part No. 619642.x the marking takes place directly on the text plate Part No. 61-9707.7, instead of a film insert.

Important: Consider pushbutton mounting orientation befor specifying engraving characters!

Lenses for indicators and illuminated pushbuttons, raised mounting

All dimensions in mm

Front size (Lens)	Film insert max. size	Height of letters h	Number of lines	Number of capital letters per line (target value)	Number of small letters per line (target value)	Image

Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e. g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e. g. 12 VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!
