Set **4** Opaque Green Part No. GS40T20

Set **5** Opaque Blue Part No. GS50T20

Set **6** Opaque Yellow Part No. GS60T20

## GRAPHIC SERIES

### Keypad Assembly Instructions

Graphic Series keypads are supplied with the key bases fitted. Each key position can be customised without dismantling the keypad. Keypad legend options can be selected from a library of standard symbols, characters or background colours. Alternatively, customised keytop graphics can be created using laser printed acetate film or screen printed polymer film. The total thickness of the coloured tile and legend tile should not exceed 0.4mm. *(Please note, paper is not recommended as the printed graphics may degrade if exposed to moisture / condensation.)*

**1** Orientate the keypad correctly by checking the connector position on the underside of the keypad.

**2** Load each key position in turn. First locate the legend tile into the transparent key cap, then locate the coloured tile (see diagram). **Before snapping the transparent key cap, including legend and customer tile, into position ensure that the legend tile's position, orientation and alignment are correct.**

Please note, if it is necessary to remove the transparent key cap a suitable tool or pliers should be used. Once removed the key cap should not be re-used; spare key caps and bases are available in sets of 4, part number GS0000.

Fonts & character sizes may differ from those shown.

Whilst every effort is made to ensure details are correct at time of production, specifications are subject to change without notice.
