GelWrap

Wrap-Around Splice Cover (1000V)

Tyco Electronic's GelWrap closure sleeves quickly and conveniently insulate and seal buried electrical connections rated up to 1000 volts. The robust, yet compact, design is engineered to handle the harsh environments of direct burial and manhole applications. GelWrap sleeves are equally well suited for insulation and jacket repair.

Features

- Installers will appreciate the simple wraparound design and dependable gel sealing performance. Simply wrap and snap the sleeve on any cable in the use range. The gel in the sleeve seals on contact. Installation is literally a snap.

- The factory cured silicone gel sealant in the GelWrap sleeve completely encapsulates the connection. Moisture cannot enter the splice.
- PowerGel sealing gel was specifically developed for the electrical power industry. PowerGel sealing gel is hydrophobic and provides an excellent moisture seal over a wide operating temperature range (-40°C to 95°C).

It is compatible with solid dielectric cable insulations.

Other common uses for GelWrap sleeves

- LV cable repair splices
- MV cable jacket repair
- MV splice rejacketing
- Elbow sealing sleeve

Note: For other sizes or application, a minimum seal length is required on each side of connector opening or jacket damage.

Use these Guidelines for Minimum Seal Distance:

GelWrap 18/4 Series 1.5" (38mm)
GelWrap 33/10 Series 2.0" (51mm)
GelWrap 50/20 Series 3.0" (75mm)

Installation Instructions

1. Center GelWrap sleeve over connector.

2. Wrap sleeve around connector and shut snap locks over entire length of sleeve.

3. Install cable ties at outermost notches of snap lock. Splice is complete.

Snap-lock made of impact resistant polypropylene provides secure installation. Latch is geometrically designed to provide easy installation, even when wearing insulated gloves.

Both the gel and housing are UV resistant and suitable for overhead applications.

Silicone gel is a high dielectric strength insulation that completely encapsulates the connection. The result is an excellent water seal. PowerGel sealing gel is specially formulated for high temperature environments.

Elastomer cover material combines outstanding tear strength, abrasion resistant, and chemical resistance with excellent flexibility and range-taking.

Product Performance

The Tyco Electronics GelWrap sleeve meets the following requirements:

Testing	Test Conditions
ANSI C119.1 - 1986	600V insulated underground
Chemical Resistance	Fluid immersion, 168 hours @ 23°C, 75% elongation retention minimum - 10W-40 motor oil - 10% hydrochloric acid - 15% sodium chloride - 20% sodium hydroxide - ETX 60280 antifreeze (1000 hours)
Accelerated Aging	1000 hours @ 135°C - 93% retention tensile strength - 82% retention elongation at break
RUS Acceptance pending
