Description

Inline desoldering iron set 80 W, 24 V, with threadless nozzle fixture system

Desoldering iron for electronics rework with internal solder reservoir. For vertical handling. Electronic temperature control. Micro finger switch controls quick start, fast action vacuum pump. Different interchangeable nozzles plus several CSF heads are available. The DSX series tools feature a novel threadless desoldering nozzle fixture system where by the nozzle is inserted into the head and locked into place by applying a 1/4 turn. This patented feature allows the desoldering nozzles to be quickly and easily exchanged and also improves the rate of thermal transfer from the desoldering head to the desoldering nozzle providing the tools with a faster heat up time and recovery rate. Additionally, because there are no threads in the head to foul, maintenance and costs are reduced.

consists of:

005 13 180 99	DXV 80
005 15 039 99	AKV 80
005 13 142 00	DX 112
