Disposable Horizontal Fold Flat Masks

The Horizontal Mask design guarantees a comfortable, efficient face fit. The large surface area gives low breathing resistance and increases the masks ability to hold larger quantities of contaminant. The Horizontal Moulded Mask offers all the advantages of a flat type product. With or without a special low pressure exhale valve which ensures user comfort and reduces CO2/heat build up within the product.

- Available Protection: FFP1, FFP2, FFP3

Product	Code	Description
Fold Flat Mask 321	BEA120-201-000	FFP2
Fold Flat Mask 322	BEB120-201-000	FFP2 - Valved

Flexinet™ Moulded Masks

The Flexinet™ Moulded Masks feature a flexible netting which ensures optimum shape retention of the mask for a secure seal during long periods of wear.

Designed to provide individuals with a range of quality moulded masks which offer high levels of performance at an affordable price.

- Ergonomically designed to provide the perfect fit for optimum comfort and an airtight seal
- Safety flexible netting retains shape and reduces breathing resistance
- P2 Odour valved Weldnet™ Welding Mask now available
- Available in P2 and P3 to protect against: Fine dusts, Fibres, Mists

Moulded Disposable Masks

Does your Face Fit? JSP are re-launching a range of different sized moulded disposable masks, in anticipation of the upcoming changes in legislation.

JSP offer a fit testing service, both qualitative and quantitative, with its Respiratory Technicians available for making site visits. The JSP moulded masks offer high user comfort and when required; an exhale valve which increases user comfort and decreases CO2 and heat build up within the product.
