

#### Features

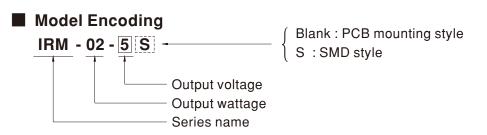

- · Universal AC input / Full range
- No load power consumption<0.075W</li>
- · Compact size
- Comply with EN55032 Class B without any additional components
- · Protections: Short circuit / Overload / Over voltage
- · Cooling by free air convection
- · Isolation Class II
- · High reliability, low cost
- · 3 years warranty

## Applications

- · Industrial electrical equipment
- Mechanical equipment
- Factory automation equipment
- · Handheld electronic device

### ■ Description

IRM-02 is a 2W miniature (33.7\*22.2\*15mm) AC-DC module-type power supply, ready to be soldered onto the PCB boards of various kinds of electronic instruments or industrial automation equipments. This product allows a universal input voltage range of 85~305VAC. The phenolic case and the fully-potted silicone enhance the heat dissipation and meet the anti-vibration demand up to 5G; moreover, it provides the fundamental resistance to dust and moisture. With the high efficiency up to 77% and the extremely low no-load power consumption below 0.075W, IRM-02 series fulfills the worldwide regulation for the low power consumption requirement for electronics. The entire series is a Class II design (no FG pin), incorporating the built-in EMI filtering components, enabling the compliance with EN55032 Class B; the supreme EMC features keep the end electronic units from electromagnetic interference. In addition to module-type model, IRM-02 series also offers the SMD style model.
