

# COMBO-WORLD TO SOUTH AFRICA

## 2in1 solution

### Don't leave without it!

Fly & Drive in South Africa. The kids are already looking forward to giraffes and zebras, but less to the long car drives. Never mind, you've taken care and the netbook is stuffed full of videogames and films. But on the third evening the battery was empty, completely empty. No problem, just charge the thing up overnight and enjoy the drive to Blyde River Canyon next day. Well, you could have done if it hadn't been these funny sockets. Charging was impossible, the plug just wouldn't fit. And the kids just did not have enough to see for a whole 435 km...

### Always ready for action

Using this travel adapter you can save your travel nerves and can connect all your 2- and 3-pole devices with mains sockets from more than 150 countries when you are there. This means that you can't just simply plug your netbook into the mains socket when you get there, you can also connect your hairdryer, electric toothbrush and your laptop without problems.

### Travel to South Africa and Europe

With the Combo-World to South Africa travel adapter, which combines the mains plugs used in Europe and South Africa. It's ideal if you travel predominantly to countries using the South African mains plug standard, but are also regularly travelling through Europe (Schuko).

Cant' live without USB? Check out the **Euro USB Charger**, which is compatible with all the SKROSS Country Adapters.

### Swiss quality

Just as all products from SKROSS, the country travel adapters are also made in familiar high Swiss quality and comply with all the relevant **international safety standards** in and, of course, are certified and patented.
