

HIF7 1.27 mm (.050") MINIATURE CONNECTORS

Scope

The HIF7 is a newly developed connector, featuring low insertion force and a 1.27 mm pitch PCB pattern to meet the ever increasing market needs.

Features

1. The connector has a "D" shaped mating section, which is ideal to prevent incorrect insertion.
2. The HIF7 has Low Insertion Force (LIF) due to Hirose's unique flexible spring contact design.
3. Long effective mating length ensures stability and sufficient contact wipe.
4. Versions with PCB lock tabs are also available.
5. The availability of many variations ensures you that you can have exactly what you need.

Application

Peripherals, office automation equipment. Mass memory storage devices, etc.

Material and Finish

Item	Material	Finish
Insulator	PBT resin	Black
Receptacle contact	Phosphor bronze	Selective gold plating
Header contact	Brass	Selective gold plating

Electrical Performance

Item	Specification
Current Rating	0.5A
Voltage Rating	125VAC
Insulation resistance	1,000M Ω or more @250VDC
Withstanding voltage	300VAC
Contact resistance	40m Ω or less at DC100mA

HIF7 Series SMT 1.27mm (0.050) CENTER LINE LIF CONNECTOR

■ INTRODUCTION

The HIF7 series is a high density, low insertion force, multiposition connector designed to meet the needs of the continued miniaturization in the electronic industry. We offer this series in 40, 50, 80 and 100 positions. The

vertical mount plug and receptacle SMT series is interchangeable with our vertical and right angle standard thru hole series.

■ FEATURES

1. "D" shape design insures proper alignment during mating.
2. L.I.F. (Low Insertion Force) is accomplished using HIROSE's uniquely designed spring structure incorporated in our "ribbon" contact.
3. To help insure better performance our contact has a larger mating area and increased wiping action for a more reliable interconnect system.
4. Molded guide pins assist in assuring proper contact alignment on the PCB.
5. Chamfered entry is used to align connectors during mating.

■ APPLICATION

For various equipment of Computer peripherals or OA devices.

MATERIAL

Item	Specification
Insulator	PPS resin (UL94V-O)
Receptacle contact	Phosphor Bronze, selective Gold plating
Header contact	Brass, selective Gold plating

ELECTRICAL

Item	Specification
Current rating	0.5A
Voltage rating	125VAC
Insulation resistance	More than 1,000 mega-ohms min. at 250VDC
Contact resistance	Less than 40 mm-ohms at 0.1A DC
Withstanding voltage	300VAC

TEMPERATURE RATING

245 to 260 degrees centigrade for more than 10 seconds. Rated for V.P.S., I.R., and Heat-blow soldering.

HIF7C Series Completely Prevents Solder and Flux Wicking (Patent Pending)

Introduction

The HIF7C series connectors that completely prevent Solder and Flux wicking have been added to the reputable connec-

tors HIF7 series for PCB-TO-PCB connection. 40, 50, 60, 68, 80, 100 and 120 positions are available.

Features

1. Unique manufacturing methods completely prevent Solder and Flux wicking.
2. Compatible with both the washing and non-washing processes for substrates.
3. All connectors are polarized to prevent mis-insertion.
4. L.I.F. (Low Insertion Force) is accomplished using HIROSE's uniquely designed spring structure incorporated in our "ribbon" contact.
5. Long effective mating length ensures highly stable.
6. The availability of many variations ensures you that you can have exactly what you need.

Application

For various equipment of Computer peripherals, OA devices or FA devices.

Clearance Hole
for Cleaning

HIF 7CA-※PA-1.27DSA

Clearance Hole
for Cleaning

HIF 7CA-※DA-1.27DSA

Note: Although the HIF7C series has Clearance hole for cleaning, please use clean washing liquid.

2. Temporary PCB hold down

When the temporary PCB Hold down process is required for PCB mounting, please use the connectors with locking tab (HIF7C or HIF7CA-※-1.27DSA(L)). (Applicable PCB thickness $t=1.6\pm0.1$)

Locking Tab

Dip Post

3. Coupling Gap Tolerance

The GAP between a mated pair of HIF7C connectors is less than 1.5mm.

(Example) HIF 7C-※PA-1.27DSA
 HIF 7C-※DA-1.27DSA

Less than 1.5mm
