PANTA FIX JUMPER

TECHNOLOGY

PANTA FIX JUMPERS are highly flexible flat conductor connectors. Solid round conductors ensure fast and safe assembly. The PANTA round-flat-round technology combines both: The copper conductors are rolled flat to a defined geometry in the insulating area. Ensuring the highest standards of vibration and bending resistance. The smooth notch-free transition from round to flat guarantees fracture-safe connection points.

BENEFITS

- ▶ High vibration and bending resistance
- ▶ Reliable and fracture-safe connection
- ▶ Very easy handling
- ▶ Immediately ready for installation
- ▶ Economizes working time and assembly costs
- ▶ Minimum space required
- ▶ High productivity by simultaneous soldering of all connection points in the solder bath
- ▶ Wiring errors are avoided
- ▶ Choice of various termination styles
- ▶ Allows combination with male connectors
- ▶ High-quality insulation materials (-40°C to +125 °C)
- ▶ Different pitches within one jumper available (MIX)
- ▶ Short insulation lengths also available as wire jumpers (without the flat rolled copper conductor end)

CHARACTERISTICS

- ▶ High vibration and bending resistance
- ▶ Smooth notch-free transition from flat to round
- ▶ Fracture-safe connection point
- ▶ Compensation of intrinsic vibrations
- ▶ Avoidance of vibration resonances

PANTA FIX JUMPER

ORDER CODE

	Pitch e.g. A=2.54 mm See pitch code	Insulation material e.g. P = Polyester N = Nomex E = PEN K = Polyimide	Termination style e.g. A = identical ends AN = different (see chart, combinations on request)
	A 05	- N 051	- A - ☐
	Number of pins	Insulation length from 15-999 mm Special lengths on request	Special designs on request, drawing required
