FRIWO – power unlimited Power supplies for all applications

FRIWO develops and produces power supplies and chargers which correspond to various technical and country specific requirements.

FRIWO Gerätebau GmbH, wholly-owned subsidiary of CEAG AG, being listed in the SDax, is the world's leading supplier of chargers and power supplies. As a global player the CEAG group is present in all the world's markets with a global sales and distribution network, and above all in those areas where you need us.

FRIWO develops and produces power supplies and chargers which correspond to various technical and country specific requirements. FRIWO has laid the foundation stone for the present market success with the launch of the first plug power supply in 1971 and is a noted leader of power supply and charger technology throughout the world.

FRIWO is continually extending its leading position in the power supply field by means of the consistent, technological advancement of the products coupled with an innovative design.

FRIWO delivers state-of-the-art power supplies and chargers in line with its strategic business units

For the four customer segments:

- IT-Communication
- Medical equipment
- Consumer
- Industrial equipment

Switchmode Power Supplies

PP 3

Conforms to IEC 60950

3 Watt

PP 3 USA/EURO

Applications

Telecom applications
Portable instruments peripherals

Characteristics

Universal input 100 - 240 V AC
Constant voltage current limited
Low leakage current < 10 μ A
Low standby power $\leq$ 0.3 Watt

PP 3 EURO

PP 3 USA

Technical data

Input voltage 100 - 240 V
Input current 85 mA
Frequency 50 - 60 Hz
Efficiency 75% typ. at full load
EMC norm Conforms to FCC, CISPR 22, EN 55022, class B
IEC 61000-4-3; IEC 61000-4-6
Output voltage tolerance $\pm$ 5%

Environmental specification

Operating temp. 0 $^{\circ}$ C to 40 $^{\circ}$ C at maximum load
Storage temp. -40 $^{\circ}$ C to 85 $^{\circ}$ C
Humidity 5% to 95% non condensing
Input Transient Susceptibility Complies with IEC 61000 requirements

Safety specification

Standards Fulfills Class II SELV for the following applications: EN 60950/IEC 60950, VDE, CE label,

Reliability specification

MTBF calculation 200,000 hours at maximum load levels and an ambient temperature of 25 $^{\circ}$ C (in correspondence with MIL-HDBK-217)

Mechanical specification

Weight 60 g
Plug connector AC input: Mains plugs are available for the following countries: EURO, USA
DC output: Universal output plug system

Output data		EURO		USA	
Voltage	Current	Part No.	Order No.	Part No.	Order No.
5 V	600 mA	15.1291	1882750	15.1301	1882760
12 V	250 mA	15.1294	1882753	15.1304	1882763

Switchmode Power Supplies

PP 6

Conforms to IEC 60950

6 Watt

PP 6 EURO

PP 6 USA

Applications

Modems
Portable battery operated equipment
Household appliances
Communication accessories

Characteristics

Universal input 100 - 240 V AC
EMC conformity
Constant voltage, current limited
Light weight, compact size
Low leakage current $< 10 \mu\text{A}$
Low standby power $\leq 0.3 \text{ Watt}$

PP 6 EURO

PP 6 USA

Technical data

Input voltage 100 V AC - 240 V AC
Input current 0.15 A
Frequency 50 - 60 Hz
Efficiency 75% typ. at full load
EMC norm Conforms to FCC, CISPR 22, EN 55022, class B
IEC 61000-4-3; IEC 61000-4-6

Output voltage tolerance

$\pm 5\%$

Environmental specification

Operating temp. 0 °C to 40 °C at maximum load
Storage temp. -40 °C to 85 °C
Humidity 5% to 95% non condensing
Input Transient Susceptibility Complies with IEC 61000 requirements

Safety specification

Standards Fulfills Class II SELV for the following applications: EN 60950/IEC 60950, VDE, CE label, UL 60950

Reliability specification

MTBF calculation 200,000 hours at maximum load levels and an ambient temperature of 25 °C (in correspondence with MIL-HDBK-217)

Mechanical specification

Weight 70 g
Plug connector AC input: Mains plugs are available for the following countries: EURO, USA
DC output: Universal output plug system

Output data

Voltage	Current	Ripple volt.	EURO		USA	
			Part No.	Order No.	Part No.	Order No.

Switchmode Power Supplies

PP 8

Conforms to IEC 60950

8 Watt

PP 8

Applications

IT equipment
Measurement and weighing technology
Laser and lighting technology
Security technology / camera technology
Office and data transmission appliances

Characteristics

Universal input 100 - 240 V AC
EMC conformity
High performance
Constant voltage, current limited
Light weight, compact size
Low leakage current < 10 μ A
Low standby power $\leq$ 0.3 Watt

PP 8 EURO

PP 8 UK

PP 8 USA

Technical data

Input voltage 100 V AC - 240 V AC
Input current 0.17 A at 115 V AC / 0.08 A at 230 V AC
Frequency 50 - 60 Hz
Efficiency 70% typ. at full load
EMC norm Conforms to FCC, CISPR 22, EN 55022, class B
IEC 61000-4-3; IEC 61000-4-6
 $\pm$ 5% at full load

Output voltage tolerance

Environmental specification

Operating temp. 0 °C to 40 °C at maximum load
Storage temp. -40 °C to 70 °C
Humidity 5% to 95% non condensing
Input Transient Susceptibility Complies with IEC 61000 requirements

Safety specification

Standards Fulfills Class II SELV for the following applications: IEC 60950, UL 60950, VDE, CE label

Frequency 47 - 63 Hz
Efficiency 80% typ. at full load
EMC norm Conforms to FCC, CISPR 22, EN 55022, class B
IEC 61000-4-3; IEC 61000-4-6
Output voltage tolerance $\pm 10\%$

Environmental specification

Operating temp. 0 °C to 40 °C at maximum load
Storage temp. -40 °C to 70 °C
Humidity 5% to 95% non condensing
Input Transient Susceptibility Complies with IEC 61000 requirements

Safety specification

Standards Fulfills Class II SELV for the following applications: UL 60950, CSA 950 (cUL), IEC 60950, VDE, CE label

Reliability specification

MTBF calculation 200,000 hours at maximum load levels and an ambient temperature of 25 °C (in correspondence with MIL-HDBK-217)

Mechanical specification

Weight 278 g
Plug connector AC input: FRIWO exchangeable mains plug system: EURO, UK, USA/Japan, Australia, ROW
DC output: Universal output plug system

Output data			Worldwide

Switchmode Power Supplies

MPP 15 Medical

Conforms to IEC 60601

15 Watt

MPP 15 Medical

Applications

Blood analyzer
Patient monitors
Measuring instruments
Laboratory technology

Characteristics

Universal input 100 - 240 V AC
Interchangeable primary adapters
Constant voltage, current limited
Green LED indicating power-on
Low leakage current < 10 μ A
Low standby power $\leq$ 0.5 Watt

MPP 15 Medical

Technical data

Input voltage 100 V AC - 240 V AC
Input current 0.4 A
Frequency 50 - 60 Hz
Efficiency 80% typ. at full load
EMC norm Conforms to FCC, CISPR 22, EN 55022, class B
IEC 61000-4-3; IEC 61000-4-6
Output voltage tolerance $\pm$ 10%

Environmental specification

Operating temp. 0 $^{\circ}$ C to 40 $^{\circ}$ C at maximum load
Storage temp. -40 $^{\circ}$ C to 70 $^{\circ}$ C
Humidity 5% to 95% non condensing
Input Transient Susceptibility Complies with IEC 61000 requirements

Safety specification

Standards Fulfills Class II SELV for the following applications: IEC 60601-1, UL 2601, VDE, CE label, fulfills medical application class B/BF/CF

Reliability specification

MTBF calculation 200,000 hours at maximum load levels and an ambient temperature of 25 $^{\circ}$ C (in correspondence with MIL-HDBK-217)

Mechanical specification

Weight 130 g
Plug connector AC input: FRIWO exchangeable mains plug system: EURO, UK, USA/Japan, Australia, ROW
DC output: Universal output plug system

World exclusive

Medical power supplies 100 - 240 V input voltage without earthing, leakage current < 10 μ A

Output data			Worldwide	
Voltage	Current	Ripple volt.	Part No.	Order No.

0.28 A (L 38-Ni) / 0.6 A (L 48-Ni) / 0.85 A (L 54-Ni)

Frequency

50 Hz

EMC norm

Conforms to FCC, CISPR 22, EN 55022, class B IEC 61000-4-3; IEC 61000-4-6

Output voltage tolerance

± 10%
- Environmental specification

Operating temp.

0 °C to 40 °C at maximum load

Storage temp.

-40 °C to 70 °C

Humidity

5% to 95% non condensing

Input Transient Susceptibility

Complies with IEC 61000 requirements
- Safety specification

Standards

Fulfills Class II SELV for the following applications: IEC 60335-2-29, EN 60335-2-29, CE label, VDE
- Reliability specification

MTBF calculation

100,000 hours at maximum load levels and an ambient temperature of 25 °C (in correspondence with MIL-HDBK-217)
- Mechanical specification

Weight

219 g (L 38-Ni) / 384 g (L 48-Ni) / 516 g (L 54-Ni)

The Secondary Adapter Plug System

Universal jacks

In addition to the standardized low voltage plug-in connections such as coaxial (in accordance with DIN 45323) and jack connectors (in accordance with DIN 45318) FRIWO also provides customized connecting cables.

The wire diameter which is generally used in this case ranges from 0.25 to 1.5 mm². Both flat and round cables can be used. FRIWO has its own plug system with self cleaning fork contacts and the corresponding sockets for or PWB installation. This plug connection is available in 2 or 3 contact design.

In addition to the safe contact and the self cleaning of the fork contacts this system also provides the advantage of extremely small dimensions. The illustrated low voltage plugs only represent one section of the comprehensive range. Customized designs, special versions and conditions and other dimensions can be obtained upon request.

Exchangeable Primary Adapters

Primary adapters

The unit series can be variably equipped with the country mains plugs which are illustrated. Your applications and products can be sold and used worldwide due to the set of all country mains plugs which can be added to the unit.

Mobility and dependability with respect to the use of the product are increased in this way and provide a constant level of dependability and availability – irrespective of the area of use.

In countries with mains plugs which are not covered by EURO, UK, USA mains plugs the ROW adapter (Rest of the world) with the 2 contact IEC 320 C 8 socket provides a standardized alternative.

Power Cords with IEC 320 C 7 Plug

2 metre power cords

Mains power cords with the 2 contact IEC 320 C 7 mains plug provide a specific solution for each country. All power cords are 2 metres long. These power cords are envisaged for use in the IEC 320 C 8 socket which go with them.

You will find the IEC 320 C 8 socket in our FRIWO ROW adapter (see page 25) in the DT 55 mains power supplies (see page 15) and also in the DT 10 mains power supplies (see page 14).

FRIWO

Standards

type-approvals

Quite often the legal requirements for power supplies are very difficult to understand, and sometimes represent a hurdle even for the specialist. In order to ensure a standardised order processing.

FRIWO has created its own standards. It represents the minimum requirements for a power supplies and chargers specification.

In case the customer did not specify detailed requirements, this proprietary standard always applies. It essentially refers to the latest revisions of applicable national and international standards on safety and EMI/EMC. You can therefore rely on a uniform safety for all FRIWO power supplies and chargers.
