

24 port Sliding tray Panel

In data networking the 19" 1u panel is the mainstay of the distribution chain.

The new Optronics 1u sliding tray panel is part of a new totally flexible system available in three options;

- Standard 24 port splice panel
- A flexible panel with three changeable front panels
- A flexible panel with three slot in modules for plug 'n' play networking

The tray is locked in place with two simple to operate plastic catches. When fully extended the tray is designed to lower to 45°, or move the tray to the side and it will lock to lower only 10°. This provides the perfect working platform for simple installation or maintenance.

Features

- **Easy installation**
- **Easy maintenance**
- **Flexible design**
- **Clear labelling**
- **Write-on labelling area**
- **Ideal open work area**
- **Pre formed tie-downs**
- **Cable openings for all cable options**
- **Cable entry both sides**
- **Available in all connector options**

Specifications

Description

The Optronics sliding tray optical fibre patch system in its basic form is supplied unloaded ready for you to install the adapter of your choice or pre-loaded complete with your required adapter and simple splice management kit. The panel can also be loaded with pre-terminated cable to meet your project needs.

The Optronics range of products has grown through the years, for full information on the Optronics connectors used on the Optronics patch cords, please contact FibreFab at the address below for a connector data sheet.

Product Packaging

Each patch-panel is boxed individually and packaged in a carton of 10 for shipping.

Dimensions

Width: 19" - 483mm
Depth: 8.0" - 200mm
Height: 1u - 44mm

24 port

ST, FC, SC, MT-RJ, LC, MU, VF45

12 port

SC duplex, LC quad

For full ordering information contact FibreFab at the numbers below

Cable entry

2 x 20mm cable gland
4 x 10mm cable gland
Blown Fibre

Pre-Terminated Options

The Sliding Tray patch panel is available pre-terminated to meet your installation needs;

- Either using normal fibre pre-terminated and installed to a panel at one end and pre-terminated connectors at the other (supplied with a pulling sock to protect the loose connectors)
- MPO fan outs ready to connect to the MPO cable assembly.
