

USB Series are designed to protect the high speed data lines against ESD transients. They have very low capacitance and fast turn on times that makes this series ideal for data and transmission lines with high data rates. The unique design enables these devices to meet the rigorous testing criteria of the IEC61000-4 standards.

Features

- Bi-directional device, similar to back-to-back Zener diodes plus an EMC capacitor in parallel.
- Low capacitance for high speed datalines.
- Protects against ESD to meet IEC61000-4-2 15kV (air) and 8kV (Contact).
- Available in EIA 0402/0603 (Single), 0405 (Dual), 0508 (Triple) and 0612 (Quad) cases.

Applications

- USB BUS Lines/Firewire Data BUS Lines
- I/O BUS Lines
- 10/100/1000 Ethernet Transmission Lines
- Video card Data Lines
