PRODUCT OVERVIEW

PRODUCT OVERVIEW

[Print Product Overview](#)

Parker's hose barb fittings are an economical choice for general purpose fluid handling and pneumatics. Manufactured in both tapered and beaded hose barb styles hose barbs are reusable and offer good vibration resistance. These hose barb fittings are intended for use with Parker's 97HC hose clamps, similar type clamps or a crimped ferrule. Parker's hose barb fittings are available for both inch and metric size hoses with NPTF, BSPT, SAE straight thread and metric threads.

Markets:

- Industrial
- Construction
- Heavy duty truck
- Mobile

Features/Benefits:

- Beaded Hose barb to straight thread port connections
- Up to 1" hose, -14 SAE and M33
- Eliminates system contamination from rust
- One piece forging
- Smaller than J1231 steel alternatives for use in confined areas

Applications:

- Compressed air lines
- Water lines
- Cooling lines

Custom configurations and sizes are available upon request. Contact Parker Fluid System Connectors Division at (269) 692-6555 or fscsales@parker.com for additional information.
