How to prevent the screwdriver from slipping out of the screw head

It happens time and time again that the tip slips out of the screw head when screwdriving, sometimes damaging valuable surfaces or even causing injury. The tips of the Wera Lasertip screwdrivers are microscopically roughened by means

of a laser. This rough surface literally "bites" itself firmly into the screw head. Slipping out becomes a thing of the past.

355 PZ Screwdriver for Pozidriv screws

Application: Suitable for Pozidriv*) screws

Blade: Round

Design: Chrome-plated, Lasertip

Handle: Kraftform with non-roll feature, multi-component
